This booklet provides advice and guidance to employers for assessment of their activities under the Control of Substances Hazardous to Health Regulations 1988 (COSHH). It replaces COSHH Assessments: A Step by Step Guide to Assessment and the Skills Needed for it published by HSE when COSHH was first introduced. This guidance takes note of the experience in assessment that has been gained since 1988 and the new requirement for regular review. The principles of assessment have not changed since COSHH first appeared, but this booklet illustrates them with extensive examples.

Among the many factors that contribute to the deterioration of the working environment, noise and vibration have an important place. This code of practice, adopted at a meeting of experts convened by the ILO, sets out the principles that should be followed for the control of workplace noise and vibration, and contains the information required for the establishment of control programmes for individual plants. The latest impression of the code incorporates modifications resulting from the adoption of IEC and ISO standards and relevant extracts from recently published ILO codes of practice.
