 An Orphan Girl. A Hellish Spirit. A fight for more than just her life... New Orleans, 1963. When Del Larouche leaves the St. Augustine orphanage, she is desperate to build a normal life for herself and Jimmy, the mentally handicapped boy she spent years protecting. But when a hellish spirit is raised from the dark swamps, unimaginable horrors begin to prey on the lost souls of the Crescent City, and Del ’ s soul is the most coveted. When she learns the truth of her secret heritage, she is faced with a choice: forego the gift she was born with for the normal life she dreams of or embrace her birthright and the dark consequences that follow. A Grimoire Dark is the spine-tingling first book in The Spirit Hunter supernatural thriller series. If you like black magic, strong female protagonists, and urban legends, then you ’ ll love this chilling tale.

 This new text, intended for the senior undergraduate finite element course in civil or mechanical engineering departments, gives students a solid basis in the mechanical principles of the finite element method and provides a theoretical foundation for applying available software analysis packages and evaluating the results obtained. Dr. Hutton discusses basic theory of the finite element method while avoiding variational calculus, instead focusing upon the engineering mechanics and mathematical background that may be expected of a senior undergraduate engineering student. The text relies upon basic equilibrium principles, introduction of the principle of minimum potential energy, and the Galerkin finite element method, which readily allows application of the FEM to nonstructural problems. The text is software-independent, making it flexible enough for use in a wide variety of programs, and offers a good selection of homework problems and examples.

 "For if you believed Moses, you would believe me; for he wrote of me." (John 5:46) Jesus's declaration frames this study of four books of the Pentateuch—Exodus, Leviticus, Numbers and Deuteronomy—as we discover the many ways that Moses wrote about Christ. Seasoned Bible teacher Nancy Guthrie shows that the Bible's story from beginning to end is the story of the Lamb—the Lamb of God who takes away the sin of the world. Over ten weeks of guided personal bible study, relevant teaching, and group discussion, you will see the person and work of Christ: in the person of Moses as a great deliverer, mediator, and prophet; in the manna, the water from the rock, and the bronze serpent on the pole; and in the priesthood, tabernacle, and sacrificial system. Gain a fresh perspective on the story of Israel's deliverance and journey, a broader understanding of Jesus as the fulfillment of Scripture, and much more, when you join with Nancy on this incredible journey to see Jesus in the Old Testament! \* A leader's guide is available as a free download at SeeingJesusInTheOldTestament.com and a supplemental DVD of Nancy's teaching is also available for purchase.

 Replacement Models with Minimal Repair is a collection of works by several well-known specialists on the subject of minimal repair in replacement policies. It gives an exhaustive list of minimal repair models for the effective planning of minimal repair and maintenance actions. Written in an engaging style, Replacement Models with Minimal Repair balances complex mathematical models with practical applications. It is divided into six parts that cover: mathematical modeling of minimal repair; preventive maintenance models and optimal scheduling of imperfect preventive maintenance activities; a new warranty servicing strategy with imperfect repair; mathematical models combining burn-in procedure and general maintenance policies; methods for parameters’ estimation of minimal repair models; and product support. Replacement Models with Minimal Repair is for anyone with an interest in minimal repair and its impact on maintenance policies and strategies. It is a particularly useful resource for researchers, practitioners, and graduate students.
