This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions

range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

It's rare to discover a candid sports autobiography-- even rare when the author is one of the most recognizable athletes in the world. But in Shaq Talks Back, Shaquille O'Neal for the first time talks frankly about his childhood, his life, his rivalries, and his career, culminating in a dramatic, behind-the-scenes account of the Los Angeles Lakers' drive to the NBA Championship. At seven feet one inch tall and 330 pounds, Shaq has always faced outsized expectations, even as a child when he towered over other kids. Shaq Talks Back is the story of how potential became reality-- how someone expected to be a champion finally learned to become one. Beginning with his memory of crying on the court after the Lakers defeated the Indiana Pacers, Shaq takes us back to his younger days in Newark and Jersey City, New Jersey, then to Georgia and finally to Germany, where he began to harness some of his height and strength. From there, he recounts the remarkable progress of his basketball career, changing from a big but inexperienced teenager to a dominant college and professional player. Shaq talks about: * Playing at Louisiana State University for the unpredictable coach Dale Brown * Signing the biggest rookie contract ever with the Orlando Magic-- and going to the NBA Finals for the first time * What happened next: dissention, disappointment, and his decision to leave for Los Angeles * The dysfunctional Lakers who were never able to win the big games * Dealing with egos as he finds the right chemistry with Kobe Bryant, Phil Jackson, and new additions to the team * Rivalries with Alonzo Mourning, Patrick Ewing, Hakeem Olajuwon, David Robinson, and others * The trouble with free throws... * "Bling-bling" and women: the larger-than-life world of NBA players off the court * Inside the Lakers' comeback from the brink against Portland and the drive to the NBA championship Funny, insightful, opinionated, and unexpectedly moving, Shaq Talks Back is the true voice of the NBA's best player.

High school students, two-year college students, and university students all need to know how to write a well-reasoned, coherent research paper—and for decades Kate Turabian's Student's Guide to Writing College Papers has helped them to develop this critical skill. In the new fourth edition of Turabian's popular guide, the team behind Chicago's widely respected The Craft of Research has reconceived and renewed this classic for today's generation. Designed for less advanced writers than Turabian's Manual of Writers of Research Papers, Theses, and Dissertations, Seventh Edition, Gregory G. Colomb and Joseph M. Williams here introduce students to the art of defining a topic, doing high-quality research with limited resources, and writing an engaging and solid college paper. The Student's Guide is organized into three sections that lead students through the process of developing and revising a paper. Part 1, "Writing Your Paper," guides students through the research process with discussions of choosing and developing a topic, validating sources, planning arguments, writing drafts, avoiding plagiarism, and presenting evidence in tables and figures. Part 2, "Citing Sources," begins with a succinct introduction to why citation is important and includes sections on the three major styles students might encounter in their work—Chicago, MLA, and APA—all with full coverage of electronic source citation. Part 3, "Style," covers all matters of style important to writers of college papers, from punctuation to spelling to presenting titles, names, and numbers. With the authority and clarity long associated with the name Turabian, the fourth edition of Student's Guide to Writing College Papers is both a solid introduction to the research process and a convenient handbook to the best practices of writing college papers. Classroom tested and filled with relevant examples and tips, this is a reference that students, and their teachers, will turn to again and again.

The Complete Plays S. L. Millward

Just about everyone who came of age during the 1960s, 70s, and 80s was influenced by MAD MAGAZINE, and no one at MAD was more influential than "MAD's MADdest Artist," Don Martin. His immediately recognizable style--featuring bulbous noses, wild sound effects, and the legendary "hinged feet"--was filled with broad and daring slapstick and routinely broke new ground. A surprisingly quiet man, Martin's work spoke volumes as he left an indelible mark on several generations, influencing the style of many illustrators while shaping the sense of humor of countless misguided youths. He was inducted into the Comic Book Hall of Fame in 2004. Says Gary Larson, creator of *The Far Side*: "Don Martin was the one who really stood out." Now, it is with great pride that Running Press, in collaboration with MAD, launches the MAD's Greatest Artists: The Completely MAD Don Martin (MAD's Greatest Artists Series). For the first time ever, here is the complete collection of every piece of art Don Martin published in MAD throughout his extraordinary thirty-year tenure (1957-1987). With all of Martin's strips, covers, posters, and stickers--presented in chronological order--it is nothing less than a masterpiece of comic genius.

Complementing Martin's opus of published works are letters, sketches, and rare photos providing an in-depth look at the artist at work. Plus, scattered throughout are notes and original illustrations--commissioned for this volume--paying tribute to the artist and penned by MAD's most-notable personalities, including Al Jaffee, Mort Drucker, Jack Davis, Sergio Aragonés, and more. There are also notes by the likes of Jim Davis (*Garfield*) and a foreword by Gary Larson. A collector's item and object d'art in its own right, this deluxe two-volume slipcased edition will be the season's must-have gift book for the millions whose childhoods--and subsequent adulthoods--would not have been the same without MAD MAGAZINE and Don Martin.
