Provides construction industry professionals with a practical and detailed guide to the NEC4 contract The NEC contract takes a collaborative, project management based approach to construction projects, which is very different to the other standard forms of construction contract. This new edition of the book covers all changes in the 4th Edition of the Engineering and Construction Contract, issued in June 2017, and will provide practical guidance to help users transitioning from NEC3 to NEC4. Inside A Practical Guide to the NEC4 Engineering and Construction Contract, readers will find chapters on the background of the NECECC; contract data and other documents; the 'spirit of mutual trust'; all of the individuals involved in the process (eg: project managers, clients, supervisors, subcontractors, etc.); communication issues, early warnings and other matters; quality management; titles; dealing with timing; payment processes; cost components; compensation procedures and assessments; dealing with terminations; dispute resolution; completing the contract and more. A practical guide to the application of the procedures contained in the newly issued NEC4 Engineering and Construction Contract Provides detailed guidance on the use of the agreement, which is claimed to offer increased flexibility, improved clarity and greater ease of use Written specifically for people actually using and administering the NEC contracts Features 3 appendixes covering tables of clause numbers, case law and statutes; employer's, project manager's, supervisor's, contractor's and adjudicator's actions; and

communication forms and their uses. First launched in 1993, the NEC has become one of the UK's leading standard forms of contract for major construction and civil engineering projects, making A Practical Guide to the NEC4 Engineering and Construction Contract a must-have resource for any contractor using the latest version of this contract.

Term Service Contract Jones & Bartlett Learning

With the release of the new NEC (formerly the New Engineering Contract), the use of the family of contracts continues to grow worldwide, as does the importance of understanding its clauses and nuances to everyone working in the

built environment. Now in its fourth edition, this set of contracts is different to others in concept as well as format, so users may well find themselves needing a helping hand along the way. Written in plain English, **Understanding NEC4: Term Service Contract** offers a practical guide to the use and management of the NEC4 Term Service Contract (TSC). The authors describe the full life of a contract, from the initial selection of options and contract formation through to the operations period and ultimately termination and dispute resolution. Although born of the same stable as the NEC4 construction contracts, the TSC is aimed at maintaining infrastructure and differs significantly from its siblings. This is the first book to be written on the new contract and takes the reader through the important provisions including communications, planning, early warnings, compensation events and payments. It is ideal for clients, contractors and their advisors describing how to deploy the contract successfully.

The authoritative guide to the NEC4 Engineering and Construction Contract The New Engineering Contract (NEC) is one of the leading standard forms of contract for major construction and infrastructure projects. The latest edition of the contract (NEC4) is now a suite of contracts widely used in the UK, Australia, Hong Kong, South Africa, Ireland, and New Zealand. This timely and important book provides a detailed commentary on the latest edition of the main NEC4 Engineering and Construction Contract (NEC4 ECC) form. It explains how the contract is intended to operate and examines each clause to consider its application and legal interpretation. It also draws upon the author's highly successful third edition of the book covering the previous contract. It identifies and comments on the changes between the current and previous version of the form. After a brief introduction to the new edition of the form, The NEC4 Engineering and Construction Contract offers in-depth chapters covering everything from main options and secondary option clauses to risk assurances and NEC 4 family contracts. In between, readers will learn about general core clauses, the obligations and responsibilities of the contractor, testing and defects, payments, compensation events, and much more. Covers the latest version of the NEC Engineering and Construction Contract, the leading standard form contract for major construction projects Examines the new contract clause by clause and compares it with the previous edition Previous editions were widely acknowledged as detailed and fair analyses of the NEC contracts Written by a highly regarded contracts commentator, experienced arbitrator, and adjudicator The NEC4 Engineering and Construction Contract: A Commentary is an excellent book for construction industry professionals working for clients, employers, main contractors, project managers, subcontractors, and specialist contractors.

This book is a practical guide for anyone involved in preparing, administering or contributing to a NEC3 contract. It introduces the NEC3 family of contracts, how they fit together, and provides a better understanding of how to build up and assemble a contract and how to run a NEC3 Engineering and Construction Contract (ECC) for successful project outcomes.

A Commentary

A series of five guides on the use of the Engineering and Construction Contract (ECC), in particular, and the NEC suite of contracts, in general. They provide practical guidance on how to prepare and manage a contract with confidence and knowledge of the effects of actions on the project and the various parties involved. They cover usage of both the 2nd edition of the Engineering and Construction Contract and NEC3 Engineering and Construction Contract, and will therefore be of value to NEC users running contracts under NEC2 as well as users and potential users looking to implement NEC3. Both Barry Trebes and Bronwyn Mitchell have wide experience of the use of the NEC through construction and management consultants, Needleman.
