The Anatomy and Physiology of the Neck | Plastic Surgery Key

Structure. In adults, the thoracic duct is typically 38 – 45 cm in length and has an average diameter of about 5 mm. The vessel usually starts from the level of the twelfth thoracic vertebrae (T12) and extends to the root of the neck. It drains into the systemic (blood) circulation at the angle of the left subclavian and internal jugular veins as a single trunk, at the commencement of the ...
