A trick of magic, a twist of fate. As the orphaned nephew of the king, trusted companion to his cousin, and second heir to the throne of Skala, Prince Tobin's future is clear. But not as clear as the spring in which a hill witch shows him his true face--and his secret destiny.... Now Tobin carries a burden he cannot share with even his closest friend, Ki, his squire. He is to rule--not as he is but as he was born: a woman. Given the shape of a boy by dark magic, Tobin is the last hope of the people of Illior--those who desperately seek a return to the old ways, when Skala was ruled by a line of warrior queens. They still believe that only a woman can lift the war, famine, and pestilence that have run rampant through the land since the king usurped his half sister's throne. It is these outlaw wizards and witches who protect Tobin--and it is for them that Tobin must accept his fate. With the unsuspecting yet fiercely loyal Ki at his side, Tobin must turn traitor against the only blood ties he has left. He must lift the masks of Skala's rulers to show their true colors--before he can reveal the power of the woman within himself.

An authorised reissue of the long out of print classic textbook, Advanced Calculus by the late Dr Lynn Loomis and Dr Shlomo Sternberg both of Harvard University has been a revered but hard to find textbook for the advanced calculus course for decades. This book is based on an honors course in advanced calculus that the authors gave in the 1960's. The foundational material, presented in the unstarred sections of Chapters 1 through 11, was normally covered, but different applications of this basic material were stressed from year to year, and the book therefore contains more material than was covered in any one year. It can accordingly be used (with omissions) as a text for a year's course in advanced calculus, or as a text for a three-semester introduction to analysis. The prerequisites are a good grounding in the calculus of one variable from a mathematically rigorous point of view, together with some acquaintance with linear algebra. The reader should be familiar with limit and continuity type arguments and have a certain amount of mathematical sophistication. As possible introductory texts, we mention Differential and Integral Calculus by R Courant, Calculus by T Apostol, Calculus by M Spivak, and Pure Mathematics by G Hardy. The reader should also have some experience with partial derivatives. In overall plan the book divides roughly into a first half which develops the calculus (principally the differential calculus) in the setting of normed vector spaces, and a second half which deals with the calculus of differentiable manifolds. Die Empty CreateSpace I was just eight-years-old, looking up

at the clouds, when Asa Calhoun became my one true love. He was my brother's best friend. He was stoic and solemn, and always believed everything in life had to be perfect. But I saw past his eccentric mannerisms. I found him fascinating. I was seventeen when I had my debutante ball. Throughout the years, there was a gradual shift between us. I stopped being the little sister he's always known me as and transformed into a lady. By the end of that night, he found me fascinating. I was twenty-one when he first kissed me. My one true love became my soulmate. I was certain nothing would ever come between us. I married at twenty-three. But I wasn't Mrs. Asa Calhoun. At the time I believed it was for the best, leaving Belgrave and my memories of Asa behind. I was twenty-eight when my husband died. The pain was swift and sharp. I saw what could have been and all that I let go of. Including Asa. Nearly seven months later I'm back in Charleston, because six years of a broken heart is too much for anyone to endure. Asa once told me he would always be my home, but will he still mean those words when I walk through the church doors and object to his marriage?
