Every inventor writes the manual for the use of his invention. A car has an owner's manual, written by the manufacturer. God the creator/inventor of the universe has written a Manual for His creation, the earth. The irrefutable fact remains that people are either not reading or yielding to the Manual since as statistics indicate 80%-85% of the US population profess to be Christians. Despite the large number of believers, we have a huge disconnect between the practices of people and the ethos of the dictates of the Bible (The Manual). Disagreements on subjects like prayer in schools, debate on the death penalty, abortion, homosexuality and divorce exist when the manual is clear on these subjects. This work makes the case that the reader obeys and uses the Word of God as the manual it ought to be. It is an authentic document proven by historical, prophetic, miracles and the life changing spiritual facts. It also looks at the major world religions, discussing how to use the manual and what not to do with it and invites people to come to life by the shed blood of Jesus. BIOGRAPHY: Dr. Bonaventure C. More than two hundred CEOs reveal their candid

insights on how to build and foster a corporate culture that encourages innovation and drives results In Quick and Nimble, Adam Bryant draws on interviews with more than two hundred CEOs to offer business leaders the wisdom and guidance to move an organization faster, to be quick and nimble, and to rekindle the whatever-it-takes collective spark of a start-up workplace, all with the goal of innovating and thriving in a relentlessly challenging global economy. By analyzing the lessons that these leaders have shared in his regular "Corner Office" feature in The New York Times, Bryant has identified the biggest drivers of corporate culture, bringing them to life with real-world examples that reflect this hard-earned wisdom. These men and women—whose ranks include Jeff Weiner of LinkedIn, Tony Hsieh of Zappos, Angie Hicks of Angie's List, Steve Case of Revolution (and formerly AOL), and Amy Gutmann of the University of Pennsylvania—offer useful insights and strategies for creating a corporate culture of innovation and building a high-performing organization that unleashes the passion and energy of its employees. As the world shifts to more of a knowledge economy, the winners will be companies that can attract and retain the best and brightest employees by creating an environment where they can grow, contribute, and feel rewarded. Through the wisdom of these leading chief executives, Quick and Nimble offers a keen understanding of leadership, recruiting, and the forces that shape corporate culture and a clear road map to bring success and energy to any organization.

What happens when a woman goes online? She becomes a girl. The unwritten contract of the internet, that a user is what is used, extends from the well-examined issue of data privacy and consent to the very selves women are encouraged to create in order to appear. Invited to self-construct as " girls online," vloggers, bloggers and influencers sign a devil's bargain: a platform on the condition they commodify themselves, eternally youthful, cute and responsibility-free, hiding offline domestic, professional and emotional labour while paying for their online presence with " accounts" of personal " experience." Told via the arresting personal narrative of one woman negotiating the (cyber)space between her identities as girl, mother, writer, and commodified online persona, Girl Online is written in a plethora of the online styles, from programming language to the blog/diary, from tweets to lyric prose, taking in selfies, social media, celebrity and Cyberfeminism.
The User Manual of Me John Wiley & Sons
How can we think of life in its dual expression, matter and experience, the living and the lived? Philosophers and, more recently, social scientists have offered multiple answers to this question, often privileging one expression or the other – the biological or the biographical. But is it possible to conceive of them together and thus reconcile naturalist and humanist approaches? Using research conducted on three continents and engaging in critical dialogue with Wittgenstein, Benjamin, and Foucault, Didier Fassin attempts to do so by developing three concepts: forms of life, ethics of life, and politics of life. In the conditions of refugees and asylum seekers, in the light of mortality statistics and death benefits, and via a genealogical and ethnographical inquiry, the moral economy of life reveals troubling tensions in the way contemporary societies treat human beings. Once the pieces of this anthropological composition are assembled, like in Georges Perec's jigsaw puzzle, an image appears: that of unequal lives.
