Hamilton Needle Point Style Guide | Hamilton Company

Hamilton Needle Point Style Guide. Several different needle

point styles are offered on Hamilton syringe and needle

products depending on the application. The correct point style

varies depending on the intended application. Below are a few

examples of common applications. Manual GC Injections:

Historically a Point Style 2 was required to achieve efficient

septum penetration with minimized coring.

Conventional coring - AAPG Wiki

Flow-through-needle injector The sample manager in the ACQUITY UPLC

H-Class system uses a flow-through-needle mechanism that differs

radically from the loop-based injector used by the ACQUITY UPLC

system. The flow-through-needle mechanism aspirates a sample and

holds it in the sample needle in preparation for injecting the

sample onto the column.
