The Power of a New Attitude

Dundurn

Racial and ethnic disparities in health care are known to reflect access to care and other issues that arise from differing socioeconomic conditions. There is, however, increasing

evidence that even after such differences are accounted for, race and ethnicity remain significant predictors of the quality of health care received. In *Unequal Treatment*, a panel of experts documents this evidence and explores how persons of color experience the health care environment. The book examines how disparities in treatment may arise in health care systems and looks at aspects of the clinical encounter that may contribute to such

disparities. Patients' and providers' attitudes, expectations, and behavior are analyzed. How to intervene? *Unequal Treatment* offers recommendations for improvements in medical care financing, allocation of care, availability of language translation, community-based care, and other arenas. The committee highlights the potential of cross-cultural education to improve provider-patient communication and offers a

detailed look at how to integrate cross-cultural learning within the health professions. The book concludes with recommendations for data collection and research initiatives.

Unequal Treatment will be vitally important to health care policymakers, administrators, providers, educators, and students as well as advocates for people of color.

Each pro or con essay considers a concrete proposal for reforming the political system. By focusing on institutions, rather than liberal or conservative public policies, students tend to leave behind ideology and grapple with

Suppose I were to begin by saying that I had fallen in love with a color . . . A lyrical, philosophical, and often explicit exploration of personal suffering and the limitations of vision and love, as refracted through the color blue. With *Bluets*, Maggie Nelson has entered the pantheon of brilliant lyric essayists. Maggie Nelson is the author of numerous books of poetry and nonfiction, including *Something Bright, Then Holes* (Soft Skull Press, 2007) and *Women*, the New York School,

and *Other True Abstractions* (University of Iowa Press, 2007). She lives in Los Angeles and teaches at the California Institute of the Arts. [Nelson Essentials of Pediatrics](#) Springer In this absorbing story of how child abuse grew from a small, private-sector charity concern into a multimillion-dollar social welfare issue, Barbara Nelson provides important new perspectives on the process of public agenda setting. Using extensive personal interviews and detailed archival research, she reconstructs an invaluable history

of child abuse policy process that in America. She shows how the mass media presented child abuse to the public, how government agencies acted and interacted, and how state and national legislatures were spurred to strong action on this issue. Nelson examines prevailing theories about agenda setting and introduces a new conceptual framework for understanding how a social issue becomes part of the public agenda. This issue of child abuse, she argues, clearly reveals the scope and limitations of social change initiated through interest-group politics. Unfortunately, the

transforms an issue into a popular cause, Nelson concludes, brings about programs that ultimately address only the symptoms and not the roots of such social problems. Finding Hope Elsevier Health Sciences Photographer Jimmy Nelson has traveled the world with his camera, visiting some of its most remote and ancient cultures: the resulting images will uplift us individually, unite us spiritually and celebrate our diversity yet common humanity. The new global language is not Chinese, English or Spanish. Jimmy Nelson believes it is the visual language of

photography. His travels to visit native peoples within small remote communities have become addictive. The bright, colourful, ecstatic feeling that comes through in the resulting photographs is in sharp contrast to a world that sometimes feels emotionally beige. They demonstrate the unique beauty of all the varieties of human life for the viewers and the subjects alike. It is the story he wants to tell and share with the world. The parallels between the biodiversity of the planet and its

cultural diversity are very clear. Our ethnodiversity, our 'ethnosphere', must also be protected. It is the sum total and manifestation of all the thoughts, dreams, myths, ideas, inspirations and intuitions produced by the human imagination since the dawn of consciousness. It is all that we have created through our endeavours as a wildly inquisitive and astonishingly adaptive species. In short, it is humanity's greatest legacy. We all come from the same source and together we are going through

an amazing period of cultural evolution. Peoples with unique cultural identities need to be truly and effectively respected, cherished and supported, for them and for all of us. If we are to do so we will all need some of the humility, vulnerability, kindness, generosity and good humour that comes through in these arresting images. **EXPLORE THE COMPANION APP** A VR viewer will be included with every copy of *Homage to Humanity*.
