He is revered everywhere as a vital force in the fight for human rights and racial equality. **LONG WALK TO FREEDOM** is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. *Making an Issue of Child Abuse* Elsevier España

In this absorbing story of how child abuse grew from a small, private-sector charity concern into a multimillion-dollar social welfare issue, Barbara Nelson provides important new perspectives on the process of public agenda setting. Using extensive personal interviews and detailed archival research, she reconstructs an invaluable history of child abuse policy in America. She shows how the mass media presented child abuse

to the public, how government agencies acted and interacted, and how state and national legislatures were spurred to strong action on this issue.

Nelson examines prevailing theories about agenda setting and introduces a new conceptual framework for understanding how a social issue becomes part of the public agenda. This issue of child abuse, she argues, clearly reveals the scope and limitations of social change initiated through interest-group politics.

Unfortunately, the process that transforms an issue into a popular cause, Nelson concludes, brings about programs that ultimately address only the symptoms and not the roots of such social problems.

Quantum Computation and Quantum Information Revell Photographer Jimmy Nelson has traveled the world with his camera, visiting some of its most remote and ancient cultures: the resulting images will uplift us individually, unite us spiritually and celebrate our diversity yet common humanity. The new global language is not

Chinese, English or Spanish. Jimmy Nelson believes it is the visual language of photography. His travels to visit native peoples within small remote communities have become addictive. The bright, colourful, ecstatic feeling that comes through in the resulting photographs is in sharp contrast to a world that sometimes feels emotionally beige. They demonstrate the unique beauty of all the varieties of human life for the viewers and the subjects alike. It is the story he wants to tell and share with the world. The parallels between

the biodiversity of the planet and its cultural diversity are very clear. Our ethnodiversity, our 'ethnosphere', must also be protected. It is the sum total and manifestation of all the thoughts, dreams, myths, ideas, inspirations and intuitions produced by the human imagination since the dawn of consciousness. It is all that we have created through our endeavours as a wildly inquisitive and astonishingly adaptive species. In short, it is humanity's greatest legacy. We all come from the same source and together we are going through an amazing

period of cultural evolution. Peoples with unique cultural identities need to be truly and effectively respected, cherished and supported, for them and for all of us. If we are to do so we will all need some of the humility, vulnerability, kindness, generosity and good humour that comes through in these arresting images. **EXPLORATION APP** VR viewer will be included with every copy of *Homage to Humanity*.
