VCE Biology Units 1&2 Complete Course Notes (2021)

Bringing together leading and emerging scholars in Systemic Functional Linguistics, this book explores the contributions made to SFL theory by James Robert Martin. A leading light in the field for 40 years, this book reviews, explores and develops the theoretical agendas set out in his momentous body of work. Focussed around the four themes of systemic functional theory, linguistic typology, educational linguistics and (positive) discourse analysis, chapters debate and develop the key concepts of Martin's work. Engaging with cutting edge theoretical debates in areas such as discourse-semantics, register and genre and affiliation, Discourses of Hope and Reconciliation examines Martin's lasting impact on the field, developing his momentous contributions to point the way to exciting future research directions in SFL.

Biology for Queensland Units 1 and 2 Workbook

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Pearson Science

The Nelson Biology VCE Units 1 & 2 Student Activity Manual has been developed to meet the aims and key skills requirements of the Biology Study Design (2006 - 2012). It provides students with assessment tasks to assist in the development of understanding of the key knowledge and satisfactory completion of the assessment for each area of study. The Activity Manual provides at least six practical activities for each area of study and each activity covers different key knowledge dot points. The activities are investigative; they allow the students to discover, learn and understand information through experimentation. The questions have been designed to assist the students to draw their understandings together into coherent ideas. Some activities are designed to allow students to plan, design and conduct their own first-hand activities. ICT skills have also been incorporated into activities where appropriate and the Nelson Biology VCE Units 1 & 2 Student Activity Manual has been developed to meet the aims and key skills requirements of the Biology Study Design (2006 - 2012).
