Executive coaching is dramatically increasing in popularity. Leaders around the world are both using coached and becoming coaches. But, the understanding of what executive coaching is and how it can increase leaders' effectiveness has not grown as fast as the application of this process. Coaching for Leadership: How the World's Greatest Coaches Help Leaders Learn brings together the best executive coaches to give the reader an understanding of how coaching works, why it works, and how leaders can make the best use of the coaching process. "Finally, coaching put into perspective-the art, the science, the impact-all expertly explained in one place! Coaching for Leadership is a must read for anyone interested

in maximizing the success of themselves and their organization."— Richard Amabile, senior director, executive development, Enron Corporation "Coaching has become one of the key competencies of successful leaders who recognize their duty to develop others. This book is an indispensable item in the executive library as it combines leading edge thought, clarity and, most important of all, real practicality."— David Bannister, director, international human resource development, KPMG UK "Coaching for Leadership provides you with the opportunity to access the best of the best. Their collective insights and advice represents a benchmark framework for those who coach or are responsible for developing the skills of coaches."— Charles J. Corace, director, management education development, Johnson Johnson Reverse Acronyms, Initialisms and Abbreviations Dictionary: a Companion Volume to Acronyms, Initialisms and Abbreviations Dictionary Pfeiffer Immunity in insects is different from immunity in vertebrates. Insects lack immunoglobulins even though they are capable of reacting against foreign components with effective defense mechanism. There has been a marked advancement in most of the fields of science in the past two decades. Insect immunity is also one of them. It is a developing subject which is now established as a new branch in insect study. This treatise is an attempt to compile meaningful articles of leading workers in this field, nevertheless we do not claim that leadership in insect immunity is by any means restricted to them. The idea is to provide a vibrant description of various aspects of "Insect Immunity". With the rapid development of the subject, it is difficult for any one author to discuss all the aspects of an area in a limited number of pages, even then they have done their utmost to include the entire development of the subject in their articles. The treatise deals with insect haemocytes, their population, isolation and role in defense mechanism, humoral encapsulation, inducible humoral antibacterial immunity, cellular immune reactions, role of endocrines, role of prophenol oxidase system in cellular communication, haemagglutinins and impact of parasite on insect immune system. Some topics could not be covered because experts in

those area though willing could not complete their commitment within time limits.

Naval Funerals at Arlington National Cemetery

As U.S. military forces appear overcommitted and some ponder a possible return to the draft, the timing is ideal for a review of how the American military transformed itself over the past five decades, from a poorly disciplined force of conscripts and draft-motivated "volunteers" to a force of professionals revered throughout the world. Starting in the early 1960s, this account runs through the current war in Iraq, with alternating chapters on the history of the all-volunteer force and the analytic background that supported decisionmaking. The author participated as an analyst and government policymaker in many of the events covered in this book. His insider status and access offer a behind-the-scenes look at decisionmaking within the Pentagon and White House. The book includes a foreword by former Secretary of Defense Melvin R. Laird. The accompanying DVD contains more than 1,700 primary-source documents-government memoranda, Presidential memos and letters, staff papers, and reports-linked directly from citations in the electronic version of the book. This unique technology presents a treasure trove of materials for specialists, researchers, and students of military history, public administration, and government affairs to draw upon.
