A Resource and Learning Tool for Health Care Professionals Amer Academy of Pediatrics Neonatal sepsis still remains a significant cause of morbidity and mortality in the newborn, particularly in preterm, low birth weight infants. Despite advances in neonatal care, overall case-fatality rates from sepsis may be as high as 50%. Clinical signs of bacterial infection are vague and non-specific, and up to now there exists no easily available, reliable marker of infection despite a large bulk of studies focussing on inflammatory indices in neonatology. Every neonatologist is faced with the uncertainty of under- or over-diagnosing bacterial infection. In this book three topics will be discussed: clinical presentation including a general approach to sepsis neonatorum and two distinct diagnoses pneumonia and osteomyelitis diagnostic approaches including C-reactive protein and the immature myeloid information, and prevention and treatment of bacterial infection with immunoglobulins.

A Multispecialty International Collaboration ASHP El presente texto viene a cubrir un hueco en lo que a los cuidados del recién nacido se refiere. Se centra en señalar la relevancia que para la salud de los recién nacidos y sus familias tienen los cuidados; en identificar y estudiar los diferentes problemas de cuidados, que no patológicas como la mayoría de los textos existentes, que pueden presentar los neonatos y, finalmente, en emplear la metodología de enfermería de NANDA, NOC y NIC para la elaboración de los planes de cuidados. Se dirige a los estudiantes de grado y posgrado con interés por el área del recién nacido y su familia, así como para las enfermeras que inician su labor asistencial en el área neonatal y las residentes de la especialidad de enfermería pediátrica. La dimensión del texto va desde la conceptualización disciplinar y profesional al estudio y manejo de la situación del recién nacido y su familia no sólo desde un planteamiento fisiopatológico sino desde una vertiente integral de las necesidades que presentan en esta etapa de la vida. Obra que aborda holisticamente el cuidado del neonato en el ámbito enfermero, tanto desde el punto de vista teórico-metodológico como desde el práctico. Estructurada en tres secciones, la obra presenta un enfoque disciplinar que resulta en el

posicionamiento histórico sobre la enfermería y la enfermería neonatal, el cuidado enfermero, y los planes teóricos y metodológicos aplicados en el ejercicio profesional. Ofrece una visión rigurosa, precisa y actual que incluye la valoración del marco teórico de D. Orem, criterios de resultados de la Clasificación de Resultados de Enfermería (NOC) e intervenciones enfermeras de la Clasificación de Intervenciones de Enfermería (NIC).
