Major concepts in the 2020 Neonatal Resuscitation guidelines are the same as in the 2015 guidelines. Changes include a new look for the algorithm and the addition of 10 take-home messages. There is an emphasis on skills development and practice to improve PPV. “ PPV has been an emphasis of NRP (Neonatal ... Newborn and Paediatric Resuscitation 2011 Guidelines The International Liaison Committee on Resuscitation (ILCOR) Neonatal Task Force reviews available resuscitation science every 5 years and develops guidelines which are integrated into educational programs such as the Neonatal Resuscitation Program (NRP). The most recent ILCOR Neonatal

Task Force consensus guidelines were published in October 2015.

Part 15: Neonatal Resuscitation | Circulation

It may be reasonable to stop resuscitation for newborns with an Apgar score of 0 after 10 minutes of optimal resuscitation; however, the decision to stop resuscitation should be individualized. If spontaneous respiration is not seen or Apgar scores of 1 to 3 at 20 minutes of age in newborns with greater than 34 weeks of gestation, it may be reasonable to stop resuscitation in settings with limited resources [9].

Updates to neonatal, pediatric resuscitation guidelines ...

The Neonatal Resuscitation ILCOR and Guidelines Task Forces continue to support use of a 3:1 ratio of compressions to ventilation, with 90 compressions and 30 breaths to achieve approximately 120 events per minute to maximize ventilation at an achievable rate 173 – 178 (Class IIa, LOE C-LD). Thus, each event will be allotted approximately a half of a second, with exhalation occurring during the first

compression after each ventilation.
