Equipment for Respiratory Care, Second Edition
continues to break the archetype of equipment texts. This text uniquely focuses on the principles of the equipment in a practical, clinically relevant manner

AWHONN's Perinatal Nursing Elsevier Health Sciences

Perfect as a resource in the field or for exam preparation, this authoritative reference from the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN) includes in-depth coverage of the most common neonatal disorders and their management. The concise outline format highlights the essentials of each condition including definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes to help you find important information quickly. This new edition also features an increased focus on evidence-based practice, new CAMTS and AAMS guidelines, new techniques for PICC placement, and changes to the Neonatal Resuscitation Program. All necessary information to prepare for the neonatal intensive care nursing certification examination is included. Concise outline format provides access to important nursing considerations associated with the management of the most common conditions in the neonate. Text provides a collaborative effort between the three most authoritative associations in neonatal intensive care nursing - AWHONN, AACN, and NANN. Information on families, ethics, legal issues, research, case management, and the transition to home acknowledge the full scope of neonatal nursing practice. NEW! CAMTS and AAMS guidelines, techniques for PICC placement, and changes to the Neonatal Resuscitation Program are just a few of the updates that reveal the importance the new edition places on

safety practices and procedures. NEW! Updated chapter on Patient Safety includes selected improvement strategies and resources for neonatal nurses to build a patient safety toolkit, discusses TeamSTEPPS (Team Strategies and Tools to Enhance Performance and Patient Safety), and recognizes human issues, such as shift work and fatigue. NEW! Increased focus on evidence-based practice for preterm infants, medications, and antepartum-intrapartum complications sets the standard for neonatal nursing practice. NEW! Strategies to promote inclusionary care better reflect nursing care today by focusing on family-centered care, comprehensive perinatal records, health care teams in the NICU, and best practices in the care of the late preterm infant. NEW! Comprehensively revised chapter on Immunology identifies risk factors for infection associated with term and preterm infants, distinguishes clinical symptoms and therapies associated with TORCHES CLAP spectrum infections, and includes prevention strategies for hospital-acquired infections. NEW! Thoroughly updated content and references reflect currency and technologic advances. NEW! Refocused chapter on Developmental Care guides the nurse to use assessment within the context of the environment and situation to initiate interventions in the moment or use patterns of responses for developing plans of care and presents core measures on evaluating developmental care practices in the NICU.

Advances in Resuscitation Research and Application: 2012 Edition ScholarlyEditions

Provide the best care possible with expert insight and clinically relevant coverage of the physiologic changes that occur throughout all major periods of the perinatal experience — prenatal, intrapartum, postpartum, and neonatal. *Maternal, Fetal & Neonatal Physiology: A Clinical Perspective, 4th Edition* gives you a solid foundation for assessment and therapeutic interventions, featuring an emphasis on the evolving interrelationships between mother, fetus, and neonate and adaptations of preterm and term infants to the extrauterine environment. Solid coverage of the physiologic bases for assessment and therapeutic interventions make this an ideal resource for advanced practice. Synthesis of the latest research studies and evidence-based practice provides vital data on normal physiologic changes during

the antepartum, intrapartum and postpartum periods; anatomic and functional development of the fetus; and developmental physiology of preterm and term neonates. Pharmacology tables offer quick access to key pharmacology information and drug effects with clinical examples. Coverage of pathophysiology and interventions for the pregnant woman, fetus, and newborn for selected abnormal events provides a solid understanding of physiologic adaptations and developmental physiology relating to major body systems and metabolic processes. Comprehensive tables, diagrams, and illustrations highlight important concepts and summarize key information Thoroughly updated content offers the very latest evidence-based information, contemporary research, and clinical developments related to maternal, fetal, and neonatal physiology. New coverage on the late pre-term infant provides the most current practice guidelines to promote quality care. Expanded discussions of reproductive processes reflect cutting-edge research and the clinical implications of physiologic and genetic effects brought to bear from both the female and the male. Extensive and reliable web sources allow for further study or checking for updated information. New NICHD standard definitions on fetal monitoring enable you to identify fetal heart rate patterns using standardized nomenclature.

The Department of Child and Adolescent Health has developed guidelines on optimal feeding of low birth weight infants in low- and middle-income countries. These guidelines include recommendations on what to feed low-birth weight infants, when to start feeding, how to feed, how often and how much to feed. The guidelines were developed using the process described in the WHO Handbook for Development of Guidelines. Systematic reviews were conducted to answer 18 priority questions identified by the guidelines development group. The population of interest is low-birth weight infants,

and the critical outcomes include mortality, severe morbidity, growth and development. The implementation of these guidelines in low- and middle-income countries is expected to improve care and survival of low birth weight infants.
