"Here is a volume that has no parallel. . . . A good reference book for those interested in the details of avian anatomy."--Science Books & Films "A gold mine of facts. . . . Every library and biology department, as well as every birder, should have a copy close at hand."--Roger Tory Peterson, from the foreword One of the most heavily illustrated ornithology references ever written, *Manual of Ornithology* is a visual guide to the structure and anatomy of birds--a basic tool for investigation for anyone curious about the fascinating world of birds. A concise atlas of anatomy, it contains more than 200 specially prepared accurate and clear drawings that include material never illustrated before. The text is as informative as the drawings; written at a level appropriate to undergraduate students and to bird lovers in general, it discusses why birds look and act the way they do. Designed to supplement a basic ornithology textbook, the *Manual of Ornithology* covers systematics and evolution, topography, feathers and flight, the skeleton and musculature, and the digestive, circulatory, respiratory, excretory, reproductive, sensory, and nervous systems of birds, as well as field techniques for watching and studying birds. Each chapter concludes with a list of key references for the topic covered, with a comprehensive bibliography at the end of the volume.

Once nearly as ubiquitous as dictionaries and cookbooks are today, letter-writing manuals and their predecessors served to instruct individuals not only on the art of letter composition but also, in effect, on personal conduct. Poster and Mitchell contend that the study of letter-writing theory, which bridges rhetorical theory and grammatical studies, represents an emerging discipline in need of definition. In this volume, they gather the contributions of eleven experts to sketch the contours of epistolary theory and collect the historic and bibliographic materials - from Isocrates to email - that form the basis for its study.
