Netbooks are lightweight, and easy to use. And best of all is the low price. Whether you already own a netbook or are considering purchasing one, the good news doesn't end there, however. Throw in some free open source and "cloud computing" software and you've got yourself a powerful little computer at a fraction of the cost of the bigger laptops and desktops. This book is all about finding the best netbook for your needs and then keeping the cost of netbook ownership down. You can choose to spend some of your savings on a few "must have" extras such as a CD/DVD burner and a nice carrying case or save even more money by installing some (or all) of the 100% free software covered in the chapters of this book. Windows Netbooks: The Path to Low-Cost Computing is your guide to pushing a netbook to its maximum potential and keeping spending to an absolute minimum. Learn how to protect your netbook with 100% free antivirus applications and then get to work with 100% free word processing, spreadsheet, email, calendar, and presentation applications. You'll find these and many more applications, along with helpful discussions on netbook hardware and maintenance, that will super-charge your netbook, your productivity, and your Internet time.

Laptops have often been seen as the domain mainly of students and businessmen. However, they are also an excellent option for senior users: their mobility means that they can be used in any location and with the advent of wireless technology they can be used in a variety of public places to surf the Web or keep in touch with family and friends. Laptops for Seniors in easy steps shows how these portable computers are ideal for seniors. Updated to cover the update to Windows 8 (Windows 8.1) the book begins by looking at some of the ergonomic issues surrounding laptops and shows how to be as comfortable as possible when using them and transporting them. It then gives an overview of the workings of laptops, including the software that is provided with them and some of the exciting new features in Windows 8.1. Issues such as using your laptop on vacation and sharing it with other family members are then looked at, to show how laptops are versatile and family-friendly. Extensive coverage is also devoted to networking and using a laptop wirelessly, with particular attention given to accessing the Internet from wireless locations (Hot Spots) such as airports, coffee shops and libraries. Laptops for Seniors in easy steps demonstrates that seniors can have the freedom to take their computing and wireless technology with them at all times and be fully paid up members of the mobile computing revolution. Ebook: Survey of Operating Systems John Wiley & Sons This book constitutes extended papers from the Third International Conference on Technology in Education, ICTE 2018, held in Hong Kong, China, in January 2018. The 27 full papers presented in this volume were carefully reviewed and selected from 88 submissions. They are organized in topical sections on new learning experience with technologies; mobile learning and flipped classrooms; instructional design and teaching practices; learning administration with technologies.

Today, law enforcement requires actionable and real-time intelligence; 24 hours a day, seven days a week to help respond to cases efficiently. When evidence is lacking in a case, law enforcement officers are often times left to rely on eyewitness descriptions. In order to quickly disseminate facial composites to news outlets and social media, law enforcement needs to rely on every tool available; including traditional forensic artists and advanced facial composite software. Creating Digital Faces for Law Enforcement provides the proper foundation for obtaining key information needed to create effective facial composites. There are two main methods to create a facial composite, first through traditional forensic art techniques and second by using commercially developed facial composite software. Traditional forensic art has advanced from pen and paper to more enhanced digital tools. This text reviews the development of digital tools used by the forensic artist describing each tool in detail. Creating Digital Faces for Law Enforcement is the first text of its kind to address the creation of digital sketches for forensic artists and software-driven sketches for non-artist/technicians. A step-by-step guide addressing the creation of digital, software-driven, sketches for non-artist technicians Includes descriptions supported by both photographs and video demonstrations to assist the reader in better understanding the process Written by an internationally-recognized police sketch artist with over 35 years of experience A companion website page will host author created / narrated videos for reader access Beginning Windows 8 McGraw Hill
