Just as a professional athlete doesn't show up without a solid game plan, ethical hackers, IT professionals, and security researchers should not be unprepared, either. The Hacker Playbook provides them their own game plans. Written by a longtime security professional and CEO of Secure Planet, LLC, this step-by-step guide to the "game" of penetration hacking features hands-on examples and helpful advice from the top of the field. Through a series of football-style "plays," this straightforward guide gets to the root of many of the roadblocks people may face while penetration testing-including attacking different types of networks, pivoting through security controls, privilege escalation, and evading antivirus software. From "Pregame" research to "The Drive" and "The Lateral Pass," the practical plays listed can be read in order or referenced as needed. Either way, the valuable advice within will put you in the mindset of a penetration tester of a Fortune 500 company, regardless of your career or level of experience. This second version of The Hacker Playbook takes all the best "plays" from the original book and incorporates the latest attacks, tools, and lessons learned. Double the content compared to its predecessor, this guide further outlines building a lab, walks through test cases for attacks, and provides more customized code. Whether you're downing energy drinks while desperately looking for an exploit, or preparing for an exciting new job in IT security, this guide is an essential part of any ethical hacker's library-so there's no reason not to get in the game.

Getting cancer is like a bomb going off in your life. Having chemotherapy can feel like another bomb. If you're getting ready for chemotherapy, you probably have many questions-but searching for answers on the internet can be overwhelming and the pamphlets from your oncologist don't begin to tell you all you need to know. You may be scared, confused or exhausted. You'll want to know what to expect and how to prepare for chemotherapy - and so will your loved ones who are supporting you. In her concise and easy-to-read guidebook, Braving Chemo, Harvard-educated physician and breast cancer survivor Beverly A. Zavaleta MD cuts through the confusion to provide you with clear answers to your most urgent chemotherapy questions. ¿Can I keep my hair from falling out? ¿What should I eat? ¿How can I keep my spirits up when I'm worried about dying? Combining her medical expertise with a survivor's experience and insight, Dr. Zavaleta provides practical advice on topics such as where to find reliable information about your treatment regimen, what you should take to your chemo session, and how to keep up your strength. Braving Chemo also confronts the challenges of cancer recovery and coping with fear of death. Whether you are a chemotherapy patient or a cancer caregiver, Braving Chemo is a valuable resource about what to expect during chemo, how to minimize the side effects, and how to live life as normally as possible when life itself is on the line.

To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond. These extreme economies illustrate the forces that test human resilience, drive societies to failure, and promise to shape our collective future. Reviving a foundational idea from the medical sciences, Extreme Economies turns the logic of modern economics on its head by arguing that these outlier societies can teach us more about our own than we might imagine. By adapting to circumstances unimaginable to most of us, the people in these societies are pioneering the economic infrastructure of the future.

" An enraged elephant flips a car onto its roof. A lioness prises open the door of a terrified couple. A leopard helps itself to a family's picnic breakfast. A fleeing impala leaps through an open car window. A lion charges around inside a busy rest camp. A hyaena snatches a baby from a tent. A tourist takes a bath in a croc-infested dam...These are just a few of the 101 jaw-dropping sightings, scrapes and encounters in this collection of extraordinary true stories from the roads, camps, picnic sites and walking trails of South Africa's Kruger National Park, as told by the very people who experienced them. There are no game ranger tales here - each and every story happened to an ordinary Kruger visitor doing what over a million tourists do in this spectacular reserve each year." -- Back cover.
