Public Problems - Private Solutions? Twelve

From the expert who understands both sides of one of the world's most complex, controversial topics, a modern-day Guide for the Perplexed—a primer on Israel and the Israeli-Palestinian conflict. "Can't you just explain the Israel situation to me? In, like, 10 minutes or less?" This is the question Daniel Sokatch is used to answering on an almost daily basis as the head of the New Israel Fund, an organization dedicated to equality and democracy for all Israelis, not just Jews, Sokatch is supremely well-versed on the Israeli conflict. Can We Talk About Israel? is the story of that conflict, and of why so many people feel so strongly about it without actually understanding it very well at all. It is an attempt to grapple with a century-long struggle between two peoples that both perceive themselves as (and indeed are) victims. And it's an attempt to explain why Israel (and the Israeli-Palestinian conflict) inspires such extreme feelings—why it seems like Israel is the answer to “what is wrong with the world” for half the people in it, and “what is right with the world” for the other half. As Sokatch asks, is there any other topic about which so many intelligent, educated and sophisticated people express such strongly and passionately held convictions, and about which they actually know so little? Complete with engaging illustrations by Christopher Noxon, Can We Talk About Israel? is an easy-to-read yet penetrating and original look at the history and basic contours of one of the most complicated conflicts in the world.

From the Jaws of Victory NewSouth

From the Jaws of Victory: The Triumph and Tragedy of Cesar Chavez and the Farm Worker Movement is the most comprehensive history ever written on the meteoric rise and precipitous decline of the United Farm Workers, the most successful farm labor union in United States history. Based on little-known sources and one-of-a-kind oral histories with many veterans of the farm worker movement, this book revises much of what we know about the UFW. Matt Garcia 's gripping account of the expansion of the union 's grape boycott reveals how the boycott, which UFW leader Cesar Chavez initially resisted, became the defining feature of the movement and drove the growers to sign labor contracts in 1970. Garcia vividly relates how, as the union expanded and the boycott spread across the United States, Canada, and Europe, Chavez found it more difficult to organize workers and fend off rival unions. Ultimately, the union was a victim of its own success and Chavez 's growing instability. From the Jaws of Victory delves deeply into Chavez 's attitudes and beliefs, and how they changed over time. Garcia also presents in-depth studies of other leaders in the UFW, including Gilbert Padilla, Marshall Ganz, Dolores Huerta, and Jerry Cohen. He introduces figures such as the co-coordinator of the boycott, Jerry Brown; the undisputed leader of the international boycott, Elaine Elinson; and Harry Kubo, the Japanese American farmer who led a successful campaign against the UFW in the mid-1970s.

All My Passions Emerald Group Publishing

For the past fifty years, ALL MY PASSIONS has been a fixture of daytime television. But like its toothless and toupee'd leading man, the venerable soap opera is clearly showing its age. In an effort to boost crumbling ratings, studio heads decide to up the sleaze factor. That is, until small town, social crusader Hamilton Bennett threatens a nationwide boycott unless the soap opera cleans up its act. The network's solution? Hire him as a 'Program Consultant,' hoping he will be dazzled by Hollywood glamour and slip quietly away. But they don't know Hamilton Bennett, and his humorous battles with cast and crew soon turn all of daytime programming on its head! A zany romantic comedy with a fun and frantic show-within-a-show format, ALL MY PASSIONS uses love, laughter and a little naughtiness to skewer Hollywood, the media and our current celebrity obsession.

Cities and city regions are undergoing rapid transformation. They are prime locations of innovation, while at the same time facing growing problems of spatial fragmentation and social exclusion. By addressing these problems, cities become forerunners for new patterns of governance, which include increasingly private actors. While research on 'global' cities has focused primarily on the world's leading financial and economic centres, comparative research on the changing role of large, complex cities in the developing world is less advanced. But it is here, where public problems are most seriously threatening the cohesion of urban society and where the need for new answers is most urgent. Illustrated by in-depth examinations of four city regions: Shanghai, Mumbai, Johannesburg and São Paulo, this book readdresses this balance. The book revisits the same set of cities from different angles, thereby reflecting urban contradictions, juxtapositions, and disjunctures.

The Rise of the U.S. Environmental Health Movement Springer Nature

This title is part of American Studies Now and available as an e-book first. Visit ucpress.edu/go/americanstudiesnow to learn more. The Boycott, Divestment, and Sanctions movement (BDS) has expanded rapidly though controversially in the United States in the last five years. The academic boycott of Israeli academic institutions is a key component of that movement. What is this boycott? Why does it make sense? And why is this an American Studies issue? These key questions and others are answered in this short essential book. Boycott! situates the academic boycott in the broader history of boycotts in the United States as well as Palestine and shows how it has evolved into a transnational social movement that has spurred profound intellectual and political shifts. It explores the movement's implications for antiracist, feminist, queer, and academic labor organizing

and examines the boycott in the context of debates about Palestine, Zionism, race, rights-based politics, academic freedom, decolonization, and neoliberal capitalism.

The Flip Side of Free Greenwood Publishing Group

Providing the first in-depth intellectual and organizational mapping of the single state idea's recent resurgence in Palestine/Israel, this book enquires into its nature as a phenomenon of resistance, as well as into its potential as a counterhegemonic force in the making against the processes of Zionism. Reconstructing this moment of re-emergence through primary material and interviews with diverse influential intellectuals—its analysis highlights their self-understandings, worldviews, strategies and perceptions of the phenomenon in which they are involved, while questioning whether the single state idea has the potential to become a Gramscian inspired movement of resistance against Zionism. In presenting this rare insight into a resistance movement in the making, this book resurrects an empowering image of Antonio Gramsci infused with the writings of Edward Said. This it does in an effort to both problematize the dominant interpretations of Gramsci's writings in International Relations, and to decolonise the abstract way in which resistance and counter hegemony are often studied in the discipline. Contributing a mapping of a silenced alternative and hopeful way forward in the context of escalating violence, this book is essential reading for those studying the Arab-Israeli conflict, Middle East Politics and International Relations.

This ambitious book provides a comprehensive history of the World Health Organization (WHO) Global Programme on AIDS (GPA), using it as a unique lens to trace the global response to the AIDS pandemic. The authors describe how WHO came initially to assume leadership of the global response, relate the strategies and approaches WHO employed over the years, and expound on the factors that led to the Programme's demise and subsequent formation of the Joint United Nations Programme on HIV/AIDS (UNAIDS). The authors examine the global impact of this momentous transition, portray the current status of the global response to AIDS, and explore the precarious situation that WHO finds itself in today as a lead United Nations agency in global health. Several aspects of the global response – the strategies adopted, the roads taken and not taken, and the lessons learned – can provide helpful guidance to the global health community as it continues tackling the AIDS pandemic and confronts future global pandemics. Included in the coverage: The response before the global response Building and coordinating a multi-sectoral response Containing the global spread of HIV Addressing stigma, discrimination, and human rights Rethinking global AIDS governance UNAIDS and its place in the global response The AIDS Pandemic: Searching for a Global Response recounts the global response to the AIDS pandemic from its inception to today. Policymakers, students, faculty, journalists, researchers, and health professionals interested in HIV/AIDS, global health, global pandemics, and the history of medicine will find it highly compelling and consequential. It will also interest those involved in global affairs, global governance, international relations, and international development.

Dropping the Torch: Jimmy Carter, the Olympic Boycott, and the Cold War offers a diplomatic history of the 1980 Olympic boycott. Broad in its focus, it looks at events in Washington, D.C., as well as the opposition to the boycott and how this attempted embargo affected the athletic contests in Moscow. Jimmy Carter based his foreign policy on assumptions that had fundamental flaws and reflected a superficial familiarity with the Olympic movement. These basic mistakes led to a campaign that failed to meet its basic mission objectives but did manage to insult the Soviets just enough to destroy détente and restart the Cold War. The book also includes a military history of the Soviet invasion of Afghanistan, which provoked the boycott, and an examination of the boycott's impact four years later at the Los Angeles Olympics, where the Soviet Union retaliated with its own boycott.

Who Sparked the Montgomery Bus Boycott?: Rosa Parks Springer

Dr. Effarah's weekly editorials and articles in this volume are based on developing events that took place involving the USA Administrations and their policies of support to Israel in the conflicts among Palestinians, Arabs and Israelis. This book is intended to those students, teachers, politicians, executives, policy makers, and others who are interested or involved in the Middle East. Dr. Effarah interprets these events and policies as reflected by his six years (2007-2012) of writings that started since 1952. As an Arab American independent thinker, he judges events according to their merits while acting as a participant observer to the one-sided American policy toward the Middle East. He records and highlights the facts in

an attempt to find the key to unlock the Palestinian, Arab and Israeli conflicts. His personal feelings and interpretations towards the proceedings represent a major part in presenting the events that took place in that period. Dr. Effarah attempts to create a voice for Arab Americans to stand up and be counted and act as an integral part of the American society. He keeps pressing for more American-Arab participation in the political process, for more transparency, and for faster and farther reaching to the Americans' hearts and minds by trying to make them understand the Arabs' situations, and Arab Christian Patrimony, culture and heritage. Dr. Effarah attempts to create an Arab American balanced policy to reach Americans and convince them that there are special interests groups and influential lobbyists in Washington, D.C. who misinform media and try to spin around while beholding to the fabricated Israeli points of view. To counterbalance the Zionist efforts, Arab Americans should "think Palestine" and ask the American citizens to find answers for why the American citizens, the taxpayers, give money outright to Israel: more than \$8.5 million per day, according to the CIA Factbook in 2012.

This is the first progressive book to argue that the BDS movement (boycott, divestment and sanctions) against Israel is the wrong way to broker peace in the Israeli-Palestinian conflict; rather, it argues that peace will come only when both Israelis' and Palestinians' legitimate claims to statehood are recognised - by both sides. The BDS movement (boycott, divestment, sanctions) against Israel has gained traction and publicity worldwide for a decade. Yet here, Philip Mendes and Nick Dyrenfurth - two politically progressive commentators - argue that BDS is far too blunt an instrument to use in such a complex political situation. Instead, they critically analyse the key arguments for and against BDS, and propose a solution that supports Israel's existence and Palestinian rights to a homeland, urging mutual compromise and concessions from both sides.

START-UP NATION addresses the trillion dollar question: How is it that Israel-- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality-- all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to re-create the "Israel effect", there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.

THINK PALESTINE ABC-CLIO

In the past few years, trust in traditional media has reached new lows. Many Americans disbelieve what they hear from the "mainstream media," and have turned to getting information from media echo chambers which are reflective of a single party or ideology. In this book, Paul Matzko reveals that this is not the first such moment in modern American history. The Radio Right tells the story of the 1960s far Right, who were frustrated by what they perceived to be liberal bias in the national media, particularly the media's sycophantic relationship with the John F. Kennedy administration. These people turned for news and commentary to a resurgent form of ultra-conservative mass media: radio. As networks shifted their resources to television, radio increasingly became the preserve of cash-strapped, independent station owners who were willing to air the hundreds of new right-wing programs that sprang up in the late 1950s and 1960s. By the early 1960s, millions of Americans listened each week to conservative broadcasters, the most prominent of which were clergy or lay broadcasters from across the religious spectrum, including Carl McIntire, Billy James Hargis, and Clarence Manion. Though divided by theology, these speakers were united by their distrust of political and theological liberalism and their antipathy towards JFK. The political influence of the new Radio Right quickly became apparent as the broadcasters attacked the Kennedy administration's policies and encouraged grassroots conservative activism on a massive scale. Matzko relates

how, by 1963, Kennedy was so alarmed by the rise of the Radio Right that he ordered the Internal Revenue Service and Federal Communications Commission to target conservative broadcasters with tax audits and enhanced regulatory scrutiny via the Fairness Doctrine. Right-wing broadcasters lost hundreds of stations and millions of listeners. Not until the deregulation of the airwaves under the Carter and Reagan administrations would right-wing radio regain its former prominence. The Radio Right provides the essential pre-history for the last four decades of conservative activism, as well as the historical context for current issues of political bias and censorship in the media.

Speaking Private Authority: The Construction of Sustainability in Forests and Fisheries expands upon current understandings of the emergent global phenomenon that is private authority. As private authority is becoming increasingly important in the conduct of global governance, broadening our collective understanding of it will prove beneficial. Roberto J. Flores argues that private actors are not simply outgrowths of existent social structures or material conditions, rather they are purposive agents strategically pursuing an agenda. Therefore, explaining private authority requires an examination of the constitutive elements that underlie this social phenomenon--to which the author applies an analytical framework that combines social network theory with discourse analysis. The author applies these tools to two cases taken from the environmental sector--forests and fisheries--and finds that as environmental politics takes on an increasingly networked character the actors that are best able to generate and wield private authority are those that strategically place themselves in-between networks through the construction of discursive nodal points around which competing actors are forced to converge--at the level of identity. The case studies specifically look at how particular actors leveraged construction of the sustainable development concept in order to strategically place themselves in advantageous positions for exercising private authority.

For well over a decade, this prized guide has served practitioners handling the legal ramifications of international contracting projects. The fifth edition expands on issues discussed in the earlier one, along with new topics that continue to redefine the researching, drafting, and execution of international contracts. All the invaluable features of earlier editions are of course still here, including analysis of key contract issues unique to various types of contracting, common contract clauses, contract checklists, insights gleaned from actual cases and arbitral proceedings, and clear explanation of the principles of good contract drafting. The major relevant international conventions, model laws, pertinent national laws, legal guides, and other documents and instruments are all covered, with primary texts provided in the appendices. Some of the new issues and topics covered include: new potential causes of force majeure and hardship (pandemics and BREXIT); review of Incoterms 2020; new clauses covered (anti-slavery, exclusion, interpretation, no-waiver, sub-contracting, sustainability clauses, among others); rise of new international commercial courts; legaltech, smart contracts, and artificial intelligence; ethics; implementation of technology in legal practice; enforceability of penalty clauses; Internet sales and agency contracts; long-term contracts and goodwill compensation; data protection and the General Data Protection Regulation (GDPR); alliance, collaboration, and cooperation agreements; noncompete and nonsolicitation clauses; e-mail disclaimers; and separation and release agreements. The book acts as a single-volume reference in the negotiating and drafting of international contracts and offers expert insights regarding the reasonableness of many contract clauses and the likelihood of their enforcement in a foreign jurisdiction. An adroit combination of contract theory and contract practice, the book continues to provide guidance to law practitioners and students alike. "International Contracting is an excellent single volume reference that highlights the different issues relating to a variety of contracts. I recommend it to drafting attorneys writing domestic as well as transborder contracts." - Christopher E. Howard (complex commercial transactions and development projects), Managing Partner, Pierce Atwood LLP, Portland, Maine "The latest edition of Professor DiMatteo's International Contracting constitutes a broad yet detailed coverage of international contract law and laws, as well as international practice. It drills down into the level of detail that supplies invaluable practical guidance of the sort not to be found in other publications." - Professor Michael G. Bridge, London School of Economics "International Contracting is an ideal source for practitioners whether of the civil or common law. It also provides a concise review of international contracting issues and practices for the scholar and student interested in this area of law. I highly recommend it as a general resource on the topic." - Michel Cannarsa, Dean & Professor, Lyon Catholic University
