This article proposes that neuroscience can shape future theory and models in consumer decision making and suggests ways that neuroscience methods can be used in decision-making research. The article argues that neuroscience facilitates better theory development and empirical testing by considering the physiological context and the role of constructs such as hunger, stress, and social ...

[Leveraging Neuroscience for Business Impact - Wharton](#)

the neuroscience of moral decision making I'm a neuroscientist at the University of Oxford in the UK. I'm interested in decision making, specifically decisions that involve tradeoffs; for example, tradeoffs between my own self-interest and the interests of other people, or tradeoffs between my present desires and my future goals.

This effect was further enhanced by the presence of uncertainty. Finally, Wu et al. provide an affective neuroscience account of decision making under risk thereby connecting the quantitative approach of economic and financial theories with the psychological approach which focuses on emotion and cognition.

decision making | Journal of Neuroscience Researchers at Karolinska Institutet have come one step closer toward understanding how the part of our brain that is central for decision-making and the development of addiction is organized on a ...
