In 1918, a strain of the Influenza virus mutated to transform itself into a

rampant pulmonary disease, and it became one of the three deadliest plagues ever recorded in human history. It will happen again, it may involve a strain of flu that is worse, and it will involve population densities that were not a factor in 1918. Under the current U.S. National Pandemic Influenza Plan, some 123 million Americans will not have access to a protective vaccine or antiviral drug, until the peak of the epidemic is almost past.

---

This book describes other major faults and assumptions in US planning and it describes several major steps that must be taken to improve readiness for the next major lethal pandemic event.

Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature?

Does the identification number 1035 indicate

ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how

to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first

At the age of just 19, JW Murphey didn't have access to large amounts of private security industry experience, a bunch of cash, an eBook or the Internet to help him start his security guard company. But, he didn't want to spend years as another cog inside of a large security corporation. Instead of staying employed with a big

corporation, he struck out on his own and started his own security agency. Now, in its 4th edition, published by The Security Officer Network, the popular *How to Start a Security Guard Company* book includes Murphey's creative strategies for building a private security agency with a minimal up-front investment. This isn't another generic "how to form a business" book. You will easily find a plethora of free resources on the Internet where you can learn business startup basics. This book won't waste your time repeating this information; instead, readers receive

immediately actionable advice that's specifically tailored to the private security industry. Written by an author who actually started his own agency, the book details his innovative approaches and strategies; imparts instruction on quantifying the cost of providing security services; gives tips for under bidding and competing against the big security companies; details tricks to minimize overhead and keep costs low and much, much more. Constantly updated and relevant, with the most recent update made in December of 2017, the book includes an array of helpful, must-have resources

including a private security business plan and numerous free-to-use forms and templates.

Many books cater to the fitness

and nutritional needs of the general public. But little of this advice is specifically directed toward those who have the literally life-or-death need to keep alcohol, drug, gambling, sex, internet and other addictions at bay. How exercise and diet speed up the recovery process and promote relapse prevention is a case rarely made, even by most treatment facilities!Rebalancing the Addictive Mind is an evidence-based, accessible guide that explains how and why exercise and diet produce faster physical, psychological and emotional recovery from

addiction and significantly reduce the chances of relapse. And how anyone, despite almost any age or infirmity, can benefit from the principles outlined in this book.Author Shelley Poerio, a licensed addiction counselor and certified fitness trainer, describes how substance dependence and behavioral compulsions change the brain and body, provides guidance and solutions to undo the damage, and motivates change in the recovering individual. Family members gain insight into how to support their loved-one in recovery and better

---

understand how addictive thinking and behaviors get out of control. Counseling and medical professionals will appreciate the cognitive-behavioral, solutions-focused therapeutic approach and the integration of exercise and nutritional concepts with 12-step recovery principles. Ms. Poerio bases her case on the biochemical science of addiction. In the early sections of the book, she examines the anatomy and functions of the brain, and explains the ability of substance and behavioral addictions to exploit brain chemistry and create cravings

and dependence. A crucially important aspect of this story, for teenagers and their parents, is that teens are particularly susceptible to developing addictions. Fortunately, the biochemistry of addiction can be turned against itself. Many of us know the positive feelings of well-being that result from working out and eating well. Rebalancing the Addictive Mind reveals in detail why this is just what the doctor ordered to fight addictions. Exercise and diet are uniquely qualified to replace the highs produced by drugs and alcohol, and undo the damage they cause. Aerobic

and strength training act as safe substitutes that stimulate the brain's neurotransmitters in much the same way that addictive substances do. Exercise promotes improved brain function and neuronal growth. Proper nutrition prevents the mood swings that can provoke a relapse, and corrects the addiction-caused deficiencies that harm major organs and bodily processes. With a bristling arsenal of therapeutic weapons, exercise and diet use restorative biology to fight the biology of addiction, and empower the brain and body to heal

---

themselves. Ms. Poerio – a former track athlete at Stanford University – draws not only on the latest research, but on her own experience. The plans she outlines combine elements of her workouts with future pro and Olympic athletes at Stanford, and with young (and old) substance abusers as the counseling/fitness-program developer at the Phoenix House of the Mid-Atlantic in Arlington, Virginia. All of her strategies are easy to put into practice, and set realistic goals. They produce encouraging results for the average person in recovery in part because they

are simple to do and likely to be used regularly. Above all, however, *Rebalancing the Addictive Mind* speaks to and motivates its readers on a very personal and understanding level. Ms. Poerio, an alcoholic/addict in recovery since 2001, introduces the book by describing her own substance-induced suicidal ideation that forced her on the road to rehabilitation. Her book includes simple anecdotes – about her work to help her clients and herself – that make it clear she has “been there and done that,” and that anyone armed with her book and the

willingness to put in some work can do it too.

The world's most infamous hacker offers an insider's view of the low-tech threats to high-tech security Kevin Mitnick's exploits as a cyber-desperado and fugitive form one of the most exhaustive FBI manhunts in history and have spawned dozens of articles, books, films, and documentaries. Since his release from federal prison,

---

in 1998, Mitnick has turned his life around and established himself as one of the most sought-after computer security experts worldwide. Now, in *The Art of Deception*, the world's most notorious hacker gives new meaning to the old adage, "It takes a thief to catch a thief." Focusing on the human factors involved with information security, Mitnick explains why all the firewalls and encryption protocols in the world will never be enough to stop a savvy grifter intent on rifling a corporate database or an irate employee determined to crash a system. With the help of many fascinating true stories of successful attacks on business and government, he illustrates just how susceptible even the most locked-down information systems are to a slick con artist impersonating an IRS agent. Narrating from the points of view of both the attacker and the victims, he explains why each attack was so successful and how it could have been prevented in an engaging and highly readable style reminiscent of a true-crime novel. And, perhaps most importantly, Mitnick offers advice for preventing these types of social engineering hacks through security protocols, training programs, and manuals that address the human element of security.

A fascinating examination of the world of private investigators by a 21st-century private eye. Today's world is complicated: companies are becoming more powerful than

---

nations, the lines between public eyes who today are being called upon to catch corrupt and corporate institutions grow murkier, and the internet is shredding our privacy. To combat these onslaughts, people everywhere -- rich and not so rich, in business and in their personal lives -- are turning away from traditional police, lawyers, and government regulators toward a new champion: the private investigator. As a private investigator, Tyler Maroney has traveled the globe, overseeing sensitive investigations and untangling complicated cases for a wide array of clients. In his new book, he shows that it's private investigators who today are being called upon to catch corrupt politicians, track down international embezzlers, and mine reams of data to reveal which CEOs are lying. The tools Maroney and other private investigators use are a mix of the traditional and the cutting edge, from old phone records to computer forensics to solid (and often inspired) street-level investigative work. The most useful assets private investigators have, Maroney has found, are their resourcefulness and their creativity. Each of the investigations Maroney explores in this book highlights an individual case and the people involved in it, and in each account he explains how the transgressors were caught and what lessons can be learned from it. Whether the clients are a Middle Eastern billionaire whose employees stole millions from him, the director of a private equity firm wanting a background check on a potential hire (a known convicted felon), or creditors of a wealthy American investor trying to recoup their money after he fled the country to avoid bankruptcy, all of them hired private investigators to

---

solve problems the authorities either can't or won't touch. In an era when it's both easier and more difficult than ever to disappear after a crime is committed, it's the modern detective people are turning to for help, for revenge, and for justice.

Lost Las Vegas traces the cherished places in the city that time and the brutal forces of economics have swept aside before the National Register of Historic Places could save them from the wrecker's ball or, in the case of Las Vegas, before the Neon Boneyard can claim them. Organised chronologically

starting with the earliest losses and ending with the latest, the book details the many hotels and casinos that failed to move with the times and got swept away for something bigger, better and brighter. Legendary names in the field of entertainment have come and gone - the Sands hotel featured many of the rapack in residence, but the casino is long gone. Howard Hughes and the mob featured heavily in Vegas history but neither could sustain their success for very long. Today, it is the showgirl who is under threat. That Vegas institution is under threat from the big setpiece shows such as Cirque du Soleil. Losses include: Arizona Club, El Portal Theater, Clark

County Courthouse, Hotel Nevada, First State Bank, Las Vegas Rail depot, El Dorado Club, Old Ice House, Atomic Tourism, Helldorado on Fremont Street, The Green Shack, El Rancho Vegas, Hotel Last Frontier, Desert Inn, Sands, Sahara, The Thunderbird, The Mint, Royal Nevada, Stardust, Showboat, Hotel Biltmore, Dunes, Hacienda, Moulin Rouge, Tally Ho, Paddlewheel/Debby Reynold's.
