We construct a time series for the augmented fiscal deficit and debt—augmented to include off-budget activity—that better illustrates the counter-cyclical role of fiscal policy. The results also show that the augmented fiscal deficit and debt are both considerably higher than the headline government data suggest. Nonetheless, at around 45 percent of GDP, the augmented debt is still at a manageable level. </p>	<p> Register of Debates in Congress, ... Congressional Globe, ... ScholarlyEditions The standard resource for teachers of the Uniform Series. REVIEWING 2013 New World Translation of Jehovah's Witnesses Routledge Volcanic eruptions have killed

thousands of people and damaged homes, villages, infrastructure, subsistence gardens, and hunting and fishing grounds in Papua New Guinea and the Solomon Islands. The central business district of a town was destroyed by a volcanic eruption in the case of Rabaul in 1994. Volcanic disasters litter not only the recent written history of both countries—particularly Papua New Guinea—but are recorded in traditional stories as well. Furthermore, evidence for disastrous volcanic eruptions many times greater than any witnessed in historical times is to

be found in the geological record. Volcanic risk is greater today than at any time previously because of larger, mainly sedentary populations on or near volcanoes in both countries. An attempt is made in this book to review what is known about past volcanic eruptions and disasters with a view to determining how best volcanic risk can be reduced today in this tectonically complex and volcanically threatening region. As a result, East Asia remains the fastest growing region in the world, despite a slowdown from the average growth rate

of 8.0 percent from 2009 to 2013. In China, growth will ease slightly, to 7.6 percent this year from 7.7 percent in 2013.
