### The Mammoth Book of Covert Ops Simon and Schuster

"Impressively reported...[Sisson] uses her deep well of knowledge to make the case that adoption is no solution for Americans' reduced access to abortion." —San Francisco Chronicle A powerful decade-long study of adoption in the age of Roe, revealing the grief of the American mothers for whom the choice to parent was never real Adoption has always been viewed as a beloved institution for building families, as well as a mutually agreeable common ground in the abortion debate, but little attention has been paid to the lives of mothers who relinquish infants for private adoption. Relinquished reveals adoption to be a path of constrained choice for those for whom abortion is inaccessible, or for whom parenthood is untenable. The stories of relinquishing mothers are stories about our country's refusal to care for families at the most basic level, and to instead embrace an individual, private solution to a large-scale, social problem. With the recent decision in *Dobbs v. Jackson Women's Health Organization* revoking abortion protections, we are in a political moment in which adoption is, increasingly, being revealed as an institution devoted to separating families and policing parenthood under the guise of feel-good family-building. Rooted in a long-term study, *Relinquished* features the in-depth testimonies of American mothers who placed their children for domestic adoption. The voices of these women are powerful and heartrending; they deserve to be heard.

### Strategic Repositioning in Times of Corporate Crisis: Green Management and Technology Adoption Simon and Schuster

The fifth volume of *A History of the Book in America* addresses the economic, social, and cultural shifts affecting print culture from World War II to the present. During this period factors such as the expansion of government, the growth of higher education, the climate of the Cold War, globalization, and the development of multimedia and digital technologies influenced the patterns of consolidation and diversification established earlier. The thirty-three contributors to the volume explore the evolution of the publishing industry and the business of bookselling. The histories of government publishing, law and policy, the periodical press, literary criticism, and reading—in settings such as schools, libraries, book clubs, self-help programs, and collectors' societies—receive imaginative scrutiny as well. The *Enduring Book* demonstrates that the corporate consolidations of the last half-century have left space for the independent publisher, that multiplicity continues to define American print culture, and that even in the digital age, the book endures. What makes a powerful and results-driven Professional Learning Community (PLC)? The answer is collaborative work that expands the emphasis on student learning and leverages individual teacher efficacy into collective teacher efficacy. PLC+: Better Decisions and Greater Impact by Design calls for strong and effective PLCs plus—and that plus is YOU. Until now, the PLC movement has been focused almost exclusively on students and what they were or were not learning. But keeping student learning at the forefront requires that we also recognize the vital role that you play in the equation of teaching and learning. This means that PLCs must take on two additional challenges: maximizing your individual expertise, while harnessing the power of the collaborative expertise you can develop with your peers. PLC+ is grounded in four cross-cutting themes—a focus on equity of access and opportunity, high expectations for all students, a commitment to building individual self-efficacy and the collective efficacy of the professional learning community and effective team activation and facilitation to move from discussion to action. The PLC+ framework supports educators in considering five essential questions as they work together to improve student learning: Where are we going? Where are we now? How do we move learning forward? What did we learn today? Who benefited and who did not benefit? The PLC+ framework leads educators to question practices as well as outcomes. It broadens the focus on student learning to encompass educational equity and teaching efficacy, and, in doing so, it leads educators to plan and implement learning communities that maximize individual expertise while harnessing the power of collaborative efficacy.

?Despite having an underdeveloped supporting infrastructure and limited resources, Kazakhstan was the first CIS country to require international financial reporting standards in 2004 for banks, and in 2005 for all public companies. What were the economic consequences of this important reform? In the 1990s, Kazakhstan's capital market reforms mirrored those of Russia due to the two countries' cooperating mode driven by a high level of resource interdependence and environmental uncertainty, following the collapse of the Soviet Union. Yet, by 2003, dependence on external donors (the IMF, World Bank) took precedence over interdependence with Russia. As a result, Kazakhstan unilaterally proceeded with adoption of IFRS, while Russia backed up from this initiative. This study reports that Kazakhstan's inflow of foreign direct investments was the greatest among the CIS nations following the adoption of IFRS. In addition, in 2005–11, Kazakhstani public firms' reporting quality was higher than that of the Russian public firms operating in a similar environment but exempt from the IFRS reporting requirement. Kazakhstan was the first CIS nation to repay its external debt ahead of schedule and to receive an investment grade from Moody's rating agency. The book concludes that Western-style capital market reforms—in this emerging market with a not-so-distant communist past—had significantly positive outcomes.?

In Road-Book America, Rowland A. Sherrill explores how the old picaresque tradition, embodied in such novels as Henry Fielding's Tom Jones and Daniel Defoe's Moll Flanders, opens to include a number of recent American texts, both fiction and nonfiction. Sketching the socially marginal, ingenuous, travelling characters common to old and new versions of the genre, Road-Book America is a wide-ranging and sophisticated discussion of the "new American picaresque", exemplified by William Least HeatMoon's Blue Highways, John Steinbeck's Travels with Charley, James Leo Herlihy's Midnight Cowboy, Bill Moyers's Listening to America, E. L. Doctorow's Billy Bathgate, and hundreds of other narratives published in the past four decades. Open, resilient, adaptable, and perennially hopeful, the protagonist of the new American picaresque follows a therapeutic path for the alienated modern self and lays the groundwork for spiritual renewal.
