the previously ongoing tension between the US and China will morph into an additionally complex and multidimensional puzzle, making it much more difficult to manage. In this book, the author provides a few basic tools for further analysis of the evolution of the new world situation, in an innovative way. Two main axes orient how analyses will be performed: the shape and evolution of the US – China relationship (and

their interactions with other international actors), and the degree of co-operation — for example, on climate change and security arrangements — in the transformed world. The author suggests that the pandemic will be responsible for new emergencies and fractures, and yet our ever more divided world will at the same time support unifying forces and links, highly dependent on technological developments being shared and/or protected. The primary

objective of this book is to draw a broad picture which will serve as a frame of reference for analysing how the community of international actors will react to major challenges — be they expected or unanticipated — in the post-pandemic world. It will be of immense interest to analysts, academics, politicians and students of international relations, geopolitics, strategy, and world affairs. English File third edition:

Intermediate: Workbook with key Pearson Longman The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this “vital, necessary, and beautiful book” (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and “allows us to understand racism as a practice not restricted to ‘bad people’” (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively. U.S. History Oxford University Closely matches the Student's Book layout Listening tracks available to download from the Student's site Literature insight offers ready-made extra lessons which introduce students to classic pieces of English literature Extra support and practice of the grammar from the Student's Book in the Grammar reference section A unit-by-unit

wordlist with dictionary style definitions which gives students more information about core vocabulary. Allows you to assign extra homework to be done online, and track your students' progress. Over 200 activities for students to practise vocabulary, grammar and skills, with new audio for the Listening tasks. Speak and record practice and writing tasks that students submit to teacher give more opportunities to practise these important skills away from the classroom. Video, audio, wordlists, language bank and grammar references

are all integrated with the activities so everything is easily accessible and in one place. Instant feedback on answers and unlimited attempts on activities inspires autonomous learning. The access code for Online Practice is on a card with the Workbook. Inside out Macmillan ELT. The series is theme-based, as this seems to be the best way to organise material for language learners - it allows material to have some real currency and allows lexis and structures to be contextualised the

topics are great for young people who are into how they look, how they feel, how they spend time, what music they listen to. Its very now. EA JOURNAL VOLUME 19 NO 2 New Inside Out takes all the best elements of the original Inside Out series - including the emphasis on personalisation and Success. Breton Publishing Company. With a task-based learning approach, the main objective is for students to use the language that they know in order to achieve a particular communication goal. Generally focussed on speaking, tasks are opportunities for in-

class communication which encourages fluency and confidence. New Cutting Edge features: * A comprehensive syllabus with thorough grammar, vocabulary and skills work * Systematic vocabulary building which focuses on high-frequency, useful words and phrases * Clearly-structured tasks to encourage student fluency and confidence Challenge your students with the 'Study, Practice, Remember' sections. Motivate your students with the self-study CD-ROMs which have additional grammar and vocabulary practice, plus 'Real life' video sequences. Engage your students with New Cutting Edge Digital -- software for interactive

whiteboards. Mini-dictionary included inside every Student's Book New Cutting Edge Intermediate takes students from B1 to B2 level of the CEF. Inside Out. Upper Intermediate. Student's Book. Per Le Scuole Superiori Brookings Institution Press New American Inside Out features national and international recognition of the original Inside Out series, incorporating all of the original features of the original series, such as custom oral production tasks. The subjects continue to be extremely current, interesting and pertinent to the

daily life of the people, favoring the oral production of the student from the beginning. Student's Book provides the skills, grammar and vocabulary foundation in an inductive way (taking the student to discover the rule of pattern) and contextualized. The contexts are realistic and not artificial, which guarantees greater possibility of association with real life and, consequently, improving learning. Emphasis on skill development. The CD-ROM is now part of the student pack. It provides a wealth of additional material. It includes interactive practice

activities, and material to practice listening and pronunciation. It can be used by the student at home (self-study) or in the classroom. The Teacher's Book comes with a test CD, this accompanying audio CD contains all the listening exercises used in the Workbook.

Inside Out Heinle ELT Runyon Heights, a community in Yonkers, New York, has been populated by middle-class African Americans for nearly a century. This book—the first history of a black middle-class community—tells

the story of Runyon Heights, which sheds light on the process of black suburbanization and the ways in which residential development in the suburbs has been shaped by race and class. Relying on both interviews with residents and archival research, Bruce D. Haynes describes the progressive stages in the life of the community and its inhabitants and the factors that enabled it to form in the first place and to develop solidarity, identity and political consciousness. He shows how residents came to recognize common political interests within the

community, how racial consciousness provided an axis for social solidarity as well as partial insulation from racial slights, and how the suburb afforded these middle-class residents a degree of physical and social distance from the ghetto. As Haynes explores the history of Runyon Heights, we learn the ways in which its black middle class dealt with the tensions between the political interests of race and the material interests of class.

The 9.9 Percent Macmillan ELT A “brilliant” (The Washington Post), “clear-eyed and incisive” (The

New Republic) analysis of how the wealthiest group in American society is making life miserable for everyone—including themselves. In 21st-century America, the top 0.1% of the wealth distribution have walked away with the big prizes even while the bottom 90% have lost ground. What 's left of the American Dream has taken refuge in the 9.9% that lies just below the tip of extreme wealth. Collectively, the members of this group control more than half of the wealth in the country—and they are doing whatever it takes to hang on

to their piece of the action in an increasingly unjust system. They log insane hours at the office and then turn their leisure time into an excuse for more career-building, even as they rely on an underpaid servant class to power their economic success and satisfy their personal needs. They have segregated themselves into zip codes designed to exclude as many people as possible. They have made fitness a national obsession even as swaths of the population lose healthcare and grow sicker. They have created an

unprecedented demand for admission to elite schools and helped to fuel the dramatic cost of higher education. They channel their political energy into symbolic conflicts over identity in order to avoid acknowledging the economic roots of their privilege. And they have created an ethos of “ merit ” to justify their advantages. They are all around us. In fact, they are us—or what we are supposed to want to be. In this “ captivating account ” (Robert D. Putnam, author of *Bowling Alone*), Matthew Stewart argues that a new

aristocracy is emerging in American society and it is repeating the mistakes of history. It is entrenching inequality, warping our culture, eroding democracy, and transforming an abundant economy into a source of misery. He calls for a regrounding of American culture and politics on a foundation closer to the original promise of America.

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic

Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D

printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “ smart factories ” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies

driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Dream Hoarders divide is not is actually hurting sparked a national conversation on the dangerous separation between the upper middle class and everyone else. Now in paperback and newly updated for the age of Trump, Brookings Institution senior fellow Richard Reeves is continuing to challenge the class system in America. In America, everyone knows that the top 1 percent are the villains. The rest of us, the 99 percent—we are the good guys. Not so, argues Reeves. The real class divide is not between the upper class and the upper middle class: it is between the upper middle class and everyone else. The separation of the upper middle class from everyone else is both economic and social, and the practice of “opportunity hoarding”—gaining exclusive access to scarce resources—is especially prevalent among parents who want to perpetuate privilege to the benefit of their children. While many families believe this is just good parenting, it is actually hurting others by reducing their chances of securing these opportunities. There is a glass floor created for each affluent child helped by his or her wealthy, stable family. That glass floor is a glass ceiling for another child. Throughout *Dream Hoarders*, Reeves explores the creation and perpetuation of opportunity hoarding, and what should be done to stop it, including controversial solutions such as ending legacy admissions to school. He offers

specific steps toward reducing inequality and asks the upper middle class to pay for it. Convinced of their merit, members of the upper middle class believes they are entitled to those tax breaks and hoarded opportunities. After all, they aren't the 1 percent. The national obsession with the super rich allows the upper middle class to convince themselves that they are just like the rest of America. In *Dream Hoarders*, Reeves argues that in many ways, they

are worse, and that changes in policy and social conscience are the only way to fix the broken system. *Middle Class Shanghai* OUP Oxford This bold, innovative book promises to radically alter our understanding of the Atlantic slave trade, and the depths of its horrors. Stephanie E. Smallwood offers a penetrating look at the process of enslavement from its African origins through the Middle Passage and into the American slave

market. Saltwater Slavery is animated by deep research and gives us a graphic experience of the slave trade from the vantage point of the slaves themselves. The result is both a remarkable transatlantic view of the culture of enslavement, and a painful, intimate vision of the bloody, daily business of the slave trade. *Inside Out* Harvard University Press No other description available.
