Student's Book A OUP Oxford

The first four levels of a new video series to
accompany the New Headway. It can be used
as an additional component to the New
Headway, or as a supplement to any course at
the appropriate level. Key Features Each level
consists of six self-contained comedy stories
looking at the lives and misadventures of four
people in their twenties who share a house. The

syllabus is closely linked to the New Headway.
Each episode provides a natural context to
consolidate the grammatical, functional and
lexical areas covered by the course, and to
develop listening skills. Key language is
controlled and contextualized throughout. Each
episode provides clear grammar and functional
language, with an emphasis on developing
communicative skills. The video is supported by
an Activity Book for students and a Video
Guide for teachers. Teacher's Book Teaching

New Headway OUP Oxford

Diverse interest in language, pedagogy, identity and community has found expression through online interaction, networking and

connectedness in the discourses captured in this book, Language,

Culture and Social Connectedness.

Issues surrounding language use in spoken, written and multimedia

forms and in sociocultural responses, indigenous knowledges

and ethnic perspectives are

currently expanding, with

consequential transnational implications for pedagogy in higher

education. Language education is no longer oriented towards grammar,

memorization and learning by rote,

but rather using language and cultural knowledge as a means to communicate and connect to others around the globe. Geographical and physical boundaries are being transcended by technology as students learn to reach out to the world around them. This book explores the intricate relationships between language, culture and social connectedness in our diverse local and transnational communities. In a period of challenge in our history, there are tensions that connect and others that tend to disconnect endeavours across the social landscape. 'Connectedness' includes relationships both formal and informal and the benefits those relationships bring to the individual as well as to society. 'Social connectedness' describes the level of engagement and trust an individual has with others in their community and the roles they take on, their friendships and participation in different activities. People who feel socially connected also contribute towards building communities and society. They help to create social capital as networks that promote effective social functions.

Understand the Math Underlying Some of Your Favorite Gambling Games Basic Gambling

Mathematics: The Numbers Behind the Neon explains the mathematics involved in analyzing games of chance, including casino games,

horse racing, and lotteries. The book helps readers understand the mathematical reasons why some gambling games are better for the player than others. It is also suitable as a textbook for an introductory course on probability. Along with discussing the mathematics of well-known casino games, the author examines game variations that have been proposed or used in actual casinos. Numerous examples illustrate the mathematical ideas in a range of casino games while end-of-chapter exercises go beyond routine calculations to give readers hands-on experience with casino-related computations. The book begins with a brief historical introduction and mathematical preliminaries before developing the essential results and applications of elementary probability, including the important idea of mathematical expectation. The author then addresses probability questions arising from a variety of games, including roulette, craps, baccarat, blackjack, Caribbean stud poker, Royal Roulette, and sic bo. The final chapter explores the mathematics behind "get rich quick" schemes, such as the martingale and the Iron Cross, and shows how simple mathematics uncovers the flaws in these systems.
