New Inspiration Level 2. Teacher's Book Lexington Books

Much of the research about teachers focuses on “those who can't/don't/aren't good” in the classroom. However, teachers who are gifted and talented exist, but there has been little attention to date on the characteristics and practices of such teachers in the classroom. While few, the examples of research on positive teacher attributes include work on the “expert,” “authentic,” and “creative” as well as examples of research on eminent adults. Identifying, Describing,

and Developing Teachers Who Are Gifted and Talented is an essential reference source that discusses behaviors and traits in teachers who are considered gifted and talented as well as case studies on the identification and preparation of teachers who fall into this category. Featuring research on topics such as creative innovation, emotional intelligence, and skill development, this book is ideally designed for educators, administrators, researchers, and academicians.

What School Could Be Routledge

An inspiring account of teachers in ordinary circumstances doing extraordinary things,

showing us how to transform education What School Could Be offers an inspiring vision of what our teachers and students can accomplish if trusted with the challenge of developing the skills and ways of thinking needed to thrive in a world of dizzying technological change. Innovation expert Ted Dintersmith took an unprecedented trip across America, visiting all fifty states in a single school year. He originally set out to raise awareness about the urgent need to reimagine education to prepare students for a world marked by innovation--but America's teachers one-upped him. All across the country, he met teachers in ordinary settings doing extraordinary things, creating innovative classrooms where children learn deeply and joyously as they gain purpose, agency, essential skillsets and mindsets, and real knowledge. Together, these new ways of teaching and learning offer a vision of what school could be—and a model for transforming schools throughout the United States and beyond. Better yet, teachers and parents don't have to wait for the revolution to come from above. They can readily implement small changes that can make a big difference. America's clock is ticking. Our archaic model of education trains our kids for a world that no longer exists, and accelerating advances in technology are eliminating millions of jobs. But the trailblazing of many American educators gives us reasons for hope. Capturing bold ideas from teachers and classrooms across America, What School Could Be provides a realistic and profoundly optimistic roadmap for creating cultures of innovation and real learning in all our schools. Turn any student into a bookworm with a few

easy and practical strategies Donalyn Miller says she has yet to meet a child she can ' t turn into a reader. No matter how far behind Miller's students might be when they reach her 6th grade classroom, they end up reading an average of 40 to 50 books a year. Miller's unconventional approach dispenses with drills and worksheets that make reading a chore. Instead, she helps students navigate the world of literature and gives them time to read books they pick out themselves. Her love of books and teaching is both infectious and inspiring. In the book, you ' ll find: Hands-on strategies for managing and improving your own school library Tactics for helping students walk on their own two feet and continue the reading habit after they ' ve finished with your class Data from student surveys and end-of-year feedback that proves how well the Miller Method works The Book Whisperer includes a dynamite list of recommended "kid lit" that helps parents and teachers find the books that students really like to read.

Winner of the Virginia and Warren Stone Prize

outstanding book on education and society What

makes a great teacher great? Who are the professors

students remember long after graduation? This book,

the conclusion of a fifteen-year study of nearly one

hundred college teachers in a wide variety of fields

and universities, offers valuable answers for all

educators. The short answer is—it's not what teachers

do, it's what they understand. Lesson plans and

lecture notes matter less than the special way teachers

comprehend the subject and value human learning.

Whether historians or physicists, in El Paso or St.

Paul, the best teachers know their subjects inside and

out—but they also know how to engage and

challenge students and to provoke impassioned

responses. Most of all, they believe two things

ferently: that teaching matters and that students can learn.
