The Palgrave Handbook of Global Rehabilitation in Criminal Justice John Wiley & Sons

This handbook provides a unique overview of rehabilitation as practiced internationally in criminal justice. Through the contributions of a diverse group that includes, among others, academics (some of whom are former practitioners), research students, a judge, and a probation chief, it reflects common features of criminal justice in different countries and documents their diversity and celebrates their vitality. In recent times the idea of ‘ law and order ’ has been expropriated by populist, authoritarian and doctrinaire regimes, almost always and nearly everywhere in the service of arbitrary and unjust rule. By and large this handbook does not include such regimes. But ‘ law ’ itself also has the capacity to constrain rulers, and ‘ order ’ in the form of social peace is a universally approved civic asset. In part, the book provides a counter-narrative demonstrating that although criminal justice dispositions such as probation, prisons, and parole can be represented as a

‘ via dolorosa ’ , rehabilitation as illustrated in these pages can become a journey that leads by degrees towards the possibility of a better life. The handbook will be of interest to students, academics, practitioners, managers, policy makers and all those who wish to gain insight into the why and the how of rehabilitation in criminal justice systems across the world.

---

Routledge Handbook of Financial Literacy provides a comprehensive reference work that addresses both research perspectives and practical applications to financial education. This is the first volume to summarize the milestones of research in financial literacy from multiple perspectives to offer an overview. The book is organized into six parts. The first three parts provide a conceptual framework, which discusses what financial literacy is, how it should be measured, and explains why it represents a relevant topic and effective tool in enhancing decision-making among consumers as well as consumer protection strategies. Part IV addresses the connection between financial education and financial literacy, with chapters about financial education in school settings as well as for adults. This part includes an analysis of the role of Fintech and the use of gamification in financial education. Part V is a collection of contributions that analyze financial

---

literacy and financial education around the world, with a focus on geographical areas including the U.S., South America, Western Europe, Eastern Europe, Asia, and Africa. This part also considers how financial literacy should be addressed in the case of Islamic finance. The concluding part of the book examines how financial literacy is related to other possible approaches to consumer finance and consumer protection, addressing the relationships between financial literacy and behavioral economics, financial well-being, and financial inclusion. This volume is an indispensable reference for scholars who are new to the topic, including undergraduate and graduate students, and for experienced researchers who wish to enrich their knowledge, policymakers seeking a broader understanding and an international perspective, and practitioners who seek knowledge of best practices as well as innovative approaches.
