Thomas Merton: God's Messenger on the Road towards a New World highlights the contribution of the best-selling North American writer between the Second World War and 1968. The Cistercian monk called people to act justly, love kindness, and walk humbly.

By his critique of technology, a major impediment for people to follow Jesus; by his writing on contemplative prayer; by his interfaith outreach; and through his witness against racism, war, and degradation of nature, Merton still matters. This book uses Micah 6:8 to organize Merton's focus on justice, lovingkindness, and humility, as well as his dialogue with Rachel Carson, Ernesto Cardinal, Gandhi, Martin Luther King, Jr., Thich Nhat Hahn, and others.

Before the Computer fully explores the data processing industry in the United States from its nineteenth-century inception down to the period when the computer became its primary tool. As James Cortada describes what was once called the "office appliance industry," he challenges our view of the digital computer as a revolutionary technology. Cortada interprets reliance on computers as a development within an important segment of the American economy that was earlier represented largely by such instruments as typewriters, tabulating machines, adding machines, and calculators. He also describes how many of the practices of the office appliance industry evolved into those of the computer world. Drawing on previously unavailable industry archives, the author adds to our understanding of IBM's early history and offers short corporate histories of firms that include NCR, Burroughs, and Remington Rand. Focusing on the United States but also including comparative material on Europe and Asia, Before the Computer will be a unique source of knowledge about the companies that built office equipment and their enormous impact on economic life. Originally published in 1993. The Princeton Legacy Library uses the latest print-on-demand technology to again

The #1 UK bestseller that presents a funny, honest, and engaging look at the craziness of modern life, explaining why we ' re all just a little bit out of our minds. In Sane New World, Ruby Wax - comedian, writer and mental health advocate - shows us just how our minds can send us mad as our internal critics play on a permanent loop tape ' Don ' t do that.. why you... you didn ' t... should have... but you didn ' t... ' . Ruby knows those voices well. She has been on a tough but ultimately enlightening journey that has taken her from battling depression to achieving a Masters

Degree from Oxford University in Mindfulness-based Cognitive Therapy. In *Sane New World*, Ruby helps us all understand why we sabotage our sanity, how our brains work and how we can rewire our thinking – often through simple mindfulness techniques - to find calm in a frenetic world.

CMJ New Music Report

What was it like to live in Britain during the Second World War? What kind of house did the average family live in? How did people cope with the ever-present threat of air-raids, not to mention the hardship of food and clothes rationing? How was a typical suburban home built? What were the choices open to householders when it came to interior decoration and furnishing? How did the war affect the domestic routines of an average household? The demands of a nation at war had many other far-reaching effects on the average home. How did women cope with bringing up a family single-handedly after their husbands were conscripted for military service? How did they use the rations and keep up their families spirits? What was it like to 'Make do and Mend' or 'Dig for Victory', or to sleep in an Anderson shelter? By looking at the lives of

ordinary people who inhabited the semi-detached world of suburbia, Mike Brown and Carol Harris have painted a vivid picture of daily life on the Home Front in wartime Britain.
