Getting the books Newspaper Article About Gun Control now is not type of challenging means. You could not unaccompanied going in imitation of book buildup or library or borrowing from your associates to door them. This is an entirely easy means to specifically get lead by on-line. This online declaration Newspaper Article About Gun Control can be one of the options to accompany you in imitation of having new time.

It will not waste your time. take me, the e-book will unconditionally tone you other situation to read. Just invest tiny epoch to approach this on-line pronouncement Newspaper Article About Gun Control as competently as evaluation them wherever you are now.

Children's Exposure to
Violence Rowman &
Littlefield
Were it not for the negative
coverage that it receives from
elite American news

organizations, the National Rifle Association and American gun culture as a whole would not be in the position of strength they enjoy today. The more negative coverage the elite media have dished out, the more people have been attracted to NRA and gun culture. Brian Anse Patrick presents the evidence for this startling case. As an analysis of the data unmistakably shows, not only are the elite media systematically biased against NRA, they have indeed inadvertently helped to

mobilize American gun culture, making it one of the most successful social movements of modern times. In the new edition of this groundbreaking study, with a new Foreword by the author, Prof. Patrick makes his case. The evidence is incontrovertible and based on scientific content analysis of ten years of actual NRA coverage in many elite news publications, compared and contrasted with similar coverage of other major American social movements. Additionally, Prof. Patrick

presents an innovative model for how information is disseminated from top-to-bottom in the mainstream media which he terms "administrative democracy," and suggests how groups like the NRA flourish in part because of the increasing availability of non-centralized social media which allow dissenters from the prevailing media paradigm to construct their own narratives with which to understand society and their place within it. Written in a lucid and penetrating style, this book

should be of interest to readers on either side of the gun rights debate, as well as to those wishing to study the workings of a successful citizens' advocacy network.

The Seven Myths of Gun Control NYU Press

This excerpt from the “masterful, timely, data-driven” study of the gun control debate examines the potential of stronger purchasing laws (Choice). As the debate on gun control continues, evidence-based research is needed to answer a crucial question: How do we reduce gun violence? One of

the biggest gun policy reforms under consideration is the regulation of firearm sales and stopping the diversion of guns to criminals. This selection from the major anthology of studies *Reducing Gun Violence in America* presents compelling evidence that stronger purchasing laws and better enforcement of these laws result in lower gun violence. Additional material for this edition includes an introduction by Michael R. Bloomberg and *Consensus Recommendations for Reforms to Federal Gun Policies* from the Johns Hopkins University.

Every gun owner should read this book and keep it as a handy reference.

[Tommy](#) Roaring Brook Press

Gun-related violence remains an intractable problem despite a decline in the past decade.

Some believe the solution lies in stricter gun control laws while others think these measures would be ineffective or counter-productive. *Guns, Gun Control, and Elections* examines current gun control policy and explains how it was adopted by discussing the roles and interactions of

elected officials, interest groups, political parties, and the public. Original research on media coverage and public opinion as well as a chapter on state policy (Virginia) make the book both informative and accessible. The book focuses on the utility of gun policy, and its discussion of policy impact is grounded in real-world politics. The author highlights the importance of gun control in the presidential elections of 2000 and 2004 as well as in some U.S. Senate and statewide campaigns.

Dying of Whiteness
Ave Maria Press

In the past decade,
no individual act of

violence has killed more people in the United States than the mass shooting. This well-researched, forcefully argued book answers some of the most pressing questions facing our society: Why do people go on killing sprees? Are gun-free zones magnets for deadly rampages? What can we do to curb the carnage of this disturbing form of firearm violence? Contrary to

conventional wisdom, the author shows that gun possession often prods aggrieved, mentally unstable individuals to go on shooting sprees; these attacks largely occur in places where guns are not prohibited by law; and sensible gun-control measures like the federal Assault Weapons Ban—which helped drastically reduce rampage violence when it was in effect—are

instrumental to keeping Americans safe from mass shootings in the future. To stem gun massacres, the author proposes several original policy prescriptions, ranging from the enactment of sensible firearm safety reforms to an overhaul of how the justice system investigates potential active-shooter threats and prosecutes violent

crimes. Calling attention to the growing problem of mass shootings, Rampage Nation demonstrates that this unique form of gun violence is more than just a criminal justice offense or public health scourge. It is a threat to American security. *Arriving at Amen* Public Affairs A former editor at the New York Times examines the war

over gun control in America and the rigid and intolerant ideologies that have informed the debate on both sides for more than 50 years. 20,000 first printing. Twenty-First Century Books Contains newspaper articles on gun control. **Children Under Fire** Gun Control and Gun Rights Could a data-driven,

problem-solving approach yield new interventions to disrupt local, illegal gun markets serving criminals, gang members, and juveniles in Los Angeles? Law enforcement can analyze patterns in crime-gun data to trace illicit firearm acquisition, use community-based interventions to stem the illegal flow, and use retail ammunition-purchase records in identifying prohibited firearm possessors. *Gun Control and Gun Rights* Greenwood

Publishing Group Longlisted for the PEN/John Kenneth Galbraith Award for Nonfiction Winner of the Goddard Riverside Stephan Russo Book Prize for Social Justice *A Newsweek Favorite Book of 2021 *An NPR 2021 "Books We Love" selection *A Washington Post Notable Work of Nonfiction *A Kirkus "2021's Best, Most Urgent Books of Current Affairs" selection Based on

the acclaimed series—a finalist for the Pulitzer Prize—an intimate account of the devastating effects of gun violence on our nation's children, and a call to action for a new way forward In 2017, seven-year-old Ava in South Carolina wrote a letter to Tyshaun, an eight-year-old boy from Washington, DC. She asked him to be her pen pal; Ava thought they could

help each other. The kids had a tragic connection—both were traumatized by gun violence. Ava's best friend had been killed in a campus shooting at her elementary school, and Tyshaun's father had been shot to death outside of the boy's elementary school. Ava's and Tyshaun's stories are extraordinary, but not unique. In the past decade, 15,000 children have been killed from gunfire, though that number does not account for the kids who weren't shot and aren't considered victims but have nevertheless been irreparably harmed by gun violence. In *Children Under Fire*, John Woodrow Cox investigates the effectiveness of gun safety reforms as well as efforts to manage children's trauma in the wake of neighborhood shootings and campus massacres, from Columbine to Marjory Stoneman Douglas. Through deep reporting, Cox addresses how we can effect change now, and help children like Ava and Tyshaun. He explores their stories and more, including a couple in South Carolina whose eleven-year-old son shot himself, a Republican politician fighting for gun safety laws, and the

charlatans infiltrating the school safety business. In a moment when the country is desperate to better understand and address gun violence, Children Under Fire offers a way to do just that, weaving wrenching personal stories into a critical call for the United States to embrace practical reforms that would save thousands of young lives.

Gun Guys Johns Hopkins University Press+ORM Annotation When the Missouri state legislature overrode Governor Bob Holden's veto in 2003 to make conceal-and-carry the law of the land, the Show-Me State became one of the last in the country to adopt this type of law. In fact, it took years of concerted

effort on the part of pro-gun advocates to make this a reality. In Showdown in the Show-Me State, William Horner chronicles this complex and fascinating fight in clear, chronological order beginning with the first bill introduced into the Missouri General Assembly in 1992 and ending with the

state supreme court's decision in 2004 that Missouri's constitution permitted the legislature to grant Missourians the right to carry concealed weapons. There is, it is often argued, no state more typically "American" than Missouri. The state is closely divided along partisan

lines, as is the nation as a whole, and in the previous century, Missouri voters have regularly chosen the winner in almost every presidential election. By offering an examination of guns and gun policy in Missouri, this book provides a glimpse into the hearts and minds of Missourians and, by

extension, of mainstream America as well. Horner's in-depth case study details the give-and-take among legislators and examines the role that interest groups played in the evolution of this divisive issue. Horner's book--part policy analysis, part interest group study, and part history--will

appeal to readers with an interest in the issue of gun control or in the political process, and it will provide a thorough resource for those who study policy making at the state level.

Gun Violence in America Abrams

This study examines how articles covering social issues are highlighted on top online daily newspapers' websites

and how that influences the audiences' emotionality and willingness to help the corresponding social issue as identified in the websites' comment sections. The articles have been gathered from five of the top online daily newspaper media outlets: USA Today, The Washington Post, The Wall Street Journal, Houston Chronicle and San

Francisco Chronicle. Three social issues are highlighted as key topics that are relevant to today's American society and typically require a need for orientation: gun control, cancer and animal rights. The method for conducting this research is a quantitative content analysis of 200 online daily newspaper articles containing audience comments. This

content analysis reveals that the negative emotions of anger and anxiety relate significantly to the commenters' tendency to express an intention to act in favor of a social issue. Articles covering the issues of gun control and animal rights had more expression of the emotion of anger in the comments than articles covering cancer. However, the data revealed that no

significant relationship is present between the three social issues and the number of engagement or action comments. Surprisingly, this content analysis reveals that the placement of an article on an online daily newspaper does not relate to media audiences' level of engagement as identified by the number of audience comments.

Rampage Nation Simon and Schuster Newtown, Connecticut. Aurora, Colorado. Both have entered our collective memory as sites of unimaginable heartbreak and mass slaughter perpetrated by lone gunmen. Meanwhile, cities such as Chicago and Washington, D.C., are dealing with the painful, everyday reality of record rates of gun-related deaths. By any account, gun violence

in the United States has reached epidemic proportions. A widely respected activist and policy analyst—as well as a former gun enthusiast and an ex-member of the National Rifle Association—Tom Diaz presents a chilling, up-to-date survey of the changed landscape of gun manufacturing and marketing. The Last Gun explores how the gun industry and the nature of gun violence have changed, including the disturbing rise in military-grade gun models. But Diaz also argues that the once formidable gun lobby has become a "paper tiger," marshaling a range of evidence and case studies to make the case that now is the time for a renewed political effort to attack gun violence at its source—the guns themselves. In the aftermath of Newtown, a challenging national conversation lies ahead. The Last Gun is an indispensable guide to this debate, and essential reading for anyone who wants to understand how we can finally rid America's streets, schools, and homes of gun violence and prevent future Newtowns.

understanding of the real stories behind them, rather than the sensationalized media narratives that too often prevail. For the first time, instead of offering thoughts and prayers for the victims of these crimes, Peterson and Densley share their data-driven solutions for exactly what we must do, at the individual level, in our communities, and as a country, to put an end to these tragedies that have defined our modern era.

Gunfight AuthorHouse

In 2010, more than 105,000 people were injured or killed in the United States as the result of a firearm-related incident. Recent, highly publicized, tragic mass shootings in Newtown, CT; Aurora, CO; Oak Creek, WI; and Tucson, AZ, have sharpened the American public's interest in protecting our children and communities from the

harmful effects of firearm violence. While many Americans legally use firearms for a variety of activities, fatal and nonfatal firearm violence poses a serious threat to public safety and welfare. In January 2013, President Barack Obama issued 23 executive orders directing federal agencies to improve knowledge of the causes of firearm violence, what might

help prevent it, and how to minimize its burden on public health. One of these orders directed the Centers for Disease Control and Prevention (CDC) to, along with other federal agencies, immediately begin identifying the most pressing problems in firearm violence research. The CDC and the CDC Foundation asked the IOM, in collaboration with the National Research Council, to convene a committee tasked with developing a potential research agenda that focuses on the causes of, possible interventions to, and strategies to minimize the burden of firearm-related violence. Priorities for Research to Reduce the Threat of Firearm-Related Violence focuses on the characteristics of firearm violence, risk and protective factors, interventions and strategies, the impact of gun safety technology, and the influence of video games and other media.
