Learn what it means to be a journalist in this fun, fast-paced new middle grade series about a club of kid reporters by an award-winning author. Nellie Murrow -- the daughter of two (former) newspaper reporters -- was named after one of the fiercest journalists who ever lived. When she moves to sleepy Bear Creek, Maine, rumors of vandalism and attacks at the only park in town are keeping her saddled to the house. Some townspeople say the attacks are gang recruitments. Others blame a vagrant spotted on the hiking trails around town. But when Nellie thinks like a reporter, none of those explanations make sense. Something is happening at the park, but what? All of the fake online news and rumors are clouding the truth. Nellie wants to break the story -- and break free from the front yard -- but she can't do it alone. She needs a whole club if she's going to start the Cub Report, the town's first independent newspaper. Creating a newspaper from scratch is going to be tough; but for Nellie, making friends is even harder. Starred Kirkus Review

Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and

study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

Now adopted by over 40 states, the Common Core State Standards provide a clear and consistent framework for public school systems as they develop student learning goals that define the path to readiness for college, careers, and informed citizenship. While each state is developing its own procedures for adoption of the Standards, individual teachers will continue to hold the ultimate responsibility for devising lesson plans and tailoring instruction to meet these benchmarks. Making Language Matter will help prospective and practicing teachers develop lessons to meet the benchmarks enumerated in the Standards for the English Language Arts categories: language, speaking and listening, writing, and reading. A timely text for literacy education courses, it explores language topics within these categories and suggests pedagogical approaches and activities for use in 9-12 language arts classrooms. Using a linguistics approach to unify the study of all the language arts, it engages readers in learning how to help students make purposeful language choices essential for both academic and workplace success.

This book shows how principles of self-regulated learning are being implemented in secondary classrooms. The 14 chapters are theoretically driven and supported by empirical research and address all common high school content areas. The book comprises 29 lesson plans in English language arts, natural and physical sciences, social studies, mathematics, foreign language, art, music, health, and physical education. Additionally, the chapters address students with special needs, technology, and homework. Each chapter begins with one or more lesson plans written by master teachers, followed by narratives explaining how the lesson plans were implemented. The chapters

conclude with an analysis written by expert researchers of the self-regulated learning elements in the lessons. Each lesson and each analysis incorporate relevant educational standards for that area. Different types of high schools in several states serve as venues. This powerful new book edited by Maria K. DiBenedetto provides a unique and invaluable resource for both secondary teachers and researchers committed to supporting adolescents in the development of academic self-regulation. Each chapter is jointly written by teachers who provide a wealth of materials, including lesson plans, and researchers who situate these lesson plans and academic self-regulation goals within the larger work on self-regulation. The topics covered are far broader than any other book I have seen in terms of developing academic self-regulation, covering over a dozen content areas, including literacy, mathematics, social studies, the sciences, and the arts. Teachers and scholars alike will find this book a must read. Karen Harris, EdD, Arizona State University A practical and magnificent blend of educational research and application. This book goes beyond presenting the findings of research on self regulation by connecting detailed strategies that align with the standards to the research. DiBenedetto et al. clearly illustrate how to develop self regulated learners in the classroom. A refreshing must read for all secondary educators and educational researchers seeking to be well grounded in education research and practical application techniques. Heather Brookman, PhD, Fusion Academy- Park Avenue Self-regulated learning is a research-based process by which teachers help students realize their own role in the learning process. Connecting Self-Regulated Learning and Performance with Instruction Across High School Content Areas consists of model teachers ' lessons and analyses by prominent educational psychologists in the field of self-regulated learning.
