Start With the Future and Work Back: A Heritage Management Manifesto is a lively, often amusing, but seriously perceptive take on the business of history and the history of business. The book explores The History Factory 's role in creating and shaping the global heritage management industry, drawing on its work with a broad array of corporations and the original business characters the firm has served since its founding in 1979. At its heart, the book is a 21st century survey of innovative business leadership that builds on the stories of courageous leaders at corporations willing to dig deeply into their inventory of experiences to support authentic communications, establish credible brand positioning, and improve employee retention and recruitment. Iconic examples of inside-out business positioning using heritage range from the sartorial remake of Brooks Brothers to stories of innovation told by company employees at Subaru; from New Balance 's immersive global headquarters exhibit that aptly conveys its dynamic culture to the creation and maintenance of the Wrigley archive. The book makes a powerful case for the brand value of applying corporate heritage for companies seeking to grow and remain relevant in a competitive, global economy.

Imagine if one sketchbook had been passed down through the decades from one Disney animator to the next, with each one making a contribution before leaving it in the talented hands of another artist. That idea was the inspiration for A Disney Sketchbook. The drawings contained within it represent the entire range of animation development, from the origins of ideas to fully conceived characters. Pencil studies of a much-younger Wendy and a serpentlike sea witch reveal the many imaginative iterations that animators create before they ultimately perfect every hero and villain. And comprehensive studies of Mickey and Baloo showcase the dedication that goes into defining the facial expressions and body language of each beloved character. Films and shorts from throughout the history of the company are featured—beginning with Steamboat Willie and ending with Tangled—demonstrating the ingenuity and skill that have remained a constant at Walt Disney Animation Studios since 1928.

A love letter to the game of baseball from one of America's foremost scribes Bob Ryan has scored every baseball game he's attended, at every level, since the start of the 1977 season. It's a deeply personal tradition still going strong at more than 1,400 games and counting. The tattered scorebooks he's filled are worn from age, travel, and countless summer days, but their grids and scrawled symbols tell the stories of milestones, rivalries, rare historic achievements, and more. In Scoring Position captures the incomparable spirit of baseball, with its infinite possibilities and madcap anomalies. Ryan, alongside baseball historian and statistician Bill Chuck, has scoured his scorecard archives for the most singular events—a switch-hitter being hit by a pitch from both sides of the plate in the same game; a player batting for the cycle off four different pitchers; even back-to-back pinch-hit home runs with two outs in the 9th. Featuring some of the game's biggest names and wildest scenarios, this is a fascinating romp through baseball history, exuding a pure zeal for this sport that fans of all teams will recognize in themselves. Part of the collection at the library of the National Baseball Hall of Fame and Museum, this volume also features reproductions of dozens of scorecards from Ryan's collection.
