Nexus 1 Ramez Naam

The Nexus Trilogy - Wikipedia

Ramez Naam is a supporter for transhumanism, and this book (this trilogy) perfectly embodies that goal. The world in Nexus is set in approx 2040 where such technologies could exist that 'enhance the human condition'. This isn't just a fictional novel but a possible extrapolation given today's technological feats and engineering.

Nexus is an aspiring techno-thriller written by "professional technologist," Ramez Naam. Naam has done his research on AI (his day job), has nearly twenty patents under his name, and has written widely on post-human topics, most notably More Than Human Embracing the Promise of Biological Enhancement. So this guy knows his stuff.

Nexus (Nexus #1) - Ramez Naam (5 / 5) I listened to the audio version of Nexus and let me tell you, it was 13 hours of nerdy-fun-brilliance!!! It has an intricate plot, basically it is set in the not too distant future. Technology has surpassed what we could have ever imagined.

This is the premise of Ramez Naam's brilliant science fiction trilogy. In Nexus, the first of the three novels, Naam explores the circumstances in which the conflict between humans and post-humans emerges into the open. Although the book is unquestionably imaginative, it is far from fantasy.

Nexus is a thriller for the post-human age, Ramez Naam does a phenomenal job of taking modern cutting edge science and building a realistic world of the near future. In Nexus Naam asks the question, "what if?". The core of the story revolves the nano-drug Nexus, which allows its users to connect mind to mind with other users around them.

Nexus allows users to connect to others' minds -- but Nexus 5 is a much more powerful and versatile tool. Essentially, it allows for software to be 'run' on it, so it can be adapted -- programmed. It is also permanent (unlike the original Nexus, which, like a drug, wears off).
