Intelligent and Fuzzy Techniques for Emerging Conditions and Digital Transformation Human Kinetics Publishers

The Ethics of Coaching Sports features invited contributions written by prominent scholars examining a broad range of normative or evaluative issues that arise from the role of the coach in competitive sports. The collection is accessible and comprehensive, including discussion of concrete issues in coaching, such as the distribution of playing time, bullying, the implications of recent events surrounding the Pennsylvania State scandal, and Title IX and gender equity. The contributing authors also explore the larger ethical considerations of the role of the coach as educator, leader, and moral role model; special considerations when coaching children; and an examination of the failures of coaches to meet appropriate standards when they

do not respect their players and their programs. Each contributor presents the main arguments and positions relevant to their chosen topic and, with the ground set, the authors then seek to advance the reader's theoretical and philosophical understanding of coaching. Robert L. Simon's introductions to each of the book's four parts help to summarize the main theses of the contributors' chapters and examine differences between how each author approaches their chosen subject. Study questions are also provided for each chapter, making *The Ethics of Coaching Sports* the perfect companion for classes on sports ethics and coaching.

Track and Field Coaching Manual National Academies Press

In this inspirational yet practical book, the man *Parade* called "the most important coach in America," subject of the national bestseller *Season of Life*, Joe Ehrmann, describes his coaching philosophy and explains how sports can transform lives at every level of play, from the earliest years to professional sports. Coaches have a tremendous platform, says Joe Ehrmann, a former Syracuse University All-American and NFL star. Perhaps second only to parents, coaches can impact young people as no one else can. But most coaches fail to do the teaching, mentoring, even life-saving intervention that their platform provides. Too many are transactional coaches; they focus solely on winning and meeting their personal needs. Some coaches, however, use their platform. They teach the Xs and Os, but also teach the Ys of life. They help young people grow into responsible adults; they leave a lasting legacy. These are the transformational coaches. These coaches change lives, and they also change society by helping to develop healthy men and women. *InSideOut Coaching* explains how to become a transformational coach. Coaches first have to "go

inside" and articulate their reasons for coaching. Only those who have taken the *InSideOut* journey can become transformational. Joe Ehrmann provides examples of coaches in his life who took this journey and taught him how to find something bigger than himself in sports. He describes his own *InSideOut* experience, starting with the death of his beloved brother, which helped him understand how sports could transcend the playing field. He gives coaches the information and the tools they need to become transformational. Joe Ehrmann has taken his message about the extraordinary power of sports all over the country. It has been warmly endorsed by NFL head coaches, athletic directors at major universities, high school head coaches, even business groups and community organizations. Now any parent-coach or school or community coach can read Ehrmann's message and learn how to make sports a life-changing experience.

Winning With Data Cengage Learning
Young children and even infants work hard at mastering various skills and show spontaneous pleasure at their own accomplishment. John Nicholls explores the conditions that cause students to lose their unselfconscious involvement in a game or task and become concerned with how they are stacking up against others. Charting the development of children's concepts of luck, effort, and ability, he argues that with age they are increasingly prone to take superiority over others as the definition of success. An emphasis on interpersonal competition, which permeates Western society, exacerbates this egotistical tendency and results in diminished accomplishment and alienation from school. To overcome these problems, Nicholls argues, we must "become as little children" for whom absorption in exploration and accomplishment come naturally, even when those around them are more competent. This ideal is unlikely to be promoted through technical approaches to education, or by the current emphasis on the role of education in economic development. Instead, Nicholls calls for a progressive approach to education. Difficult though it is to implement, this approach is most likely to increase equality of motivation for intellectual development, substantial accomplishment, satisfaction in work, and more productive relations with others. These are important ideas for anyone interested in achievement motivation, for those professionally involved in education, and for nonspecialists interested in, or worried about, how we educate our children.
