This Guide covers insulation resistance (IR) testing of low voltage (LV) circuits – typically 230/400 V-rated, and FELV circuits. It does not cover IR testing of SELV and PELV circuits; see NICEIC and ELECSA Pocket Guide 27. IR testing is one of the vital safety checks that BS 7671 requires to be carried out

POCKET GUIDE 14 Sizing of protective conductors by selection Regulation Group 543.1 of BS 7671 requires that a protective conductor other than protective bonding conductor is sized either by calculation or selection. This Guide covers the sizing of protective conductors by selection, which uses Table 54.7 of BS 7671, as explained later.
