What is it like to resuscitate a baby on the cusp of viability, to purposely induce hypothermia, to remove and replace twice a baby's blood volume within a few hours? How do you confront the turmoil of emotions when everything goes wrong? Every year half a million babies are admitted to neonatal intensive care units across the country, their stories and experiences largely hidden from view. With compassion and powerfully moving insight, neonatologist Benjamin Rattray takes readers behind closed doors to reveal heartbreaking realities, joyful and unexpected recoveries, and the often long, uncertain road of recovery encountered in newborn critical care. Captivating, beautifully written, and deeply personal, When All Becomes New shares a doctor's intimate reflections on life and medicine, the tension between faith and suffering, and how faith and hope can change the way we see the world.

' Fascinating and moving.' - Adam Kay, author of *This is Going to Hurt* A BBC Radio 4 A Good Read choice This is a story about the cutting-edge medicine that has saved a generation of babies. It's about the love and fear a parent feels for a child they haven't yet met. It's about doctors, mothers, fathers and babies as together they fight for the first breath. *The First Breath* is a book about motherhood and medicine. Olivia

Gordon decided to find out how, exactly, modern science saved her son's life. Crossing medical memoir with popular science, *The First Breath* is an investigation into the pioneering fetal and neonatal care bringing a new generation into the world, who would not have lived if they had been born only a few decades ago. *The First Breath* explores the female experience of medicine and details the relationship mothers develop with doctors who hold not only life and death in their hands, but also the very possibility of birth. From the dawn of fetal medicine to neonatal surgery and the exploding field of perinatal genetics, *The First Breath* tells of fear, bravery and love. Olivia Gordon takes the reader behind the closed doors of the fetal and neonatal intensive care units, resuscitation rooms and operating theatres at some of the world's leading children's hospitals, unveiling the untold story of how doctors save the sickest babies.
