Field Guide for Shooting
after ...

Co-author Jennifer Wu, an elite Canon "Explorer of Light" professional photographer, has become renowned for her ability to capture nighttime phenomena, from quarter-phase moon rises to shooting stars to the ephemeral Milky Way. this new guide reveals her methods and concentrates on photographing four principal subjects: stars as points of light, star trails, the moon, and twilight. these subjects share common photo techniques and considerations, but each also requires a distinct approach.

A great guide for night sky photography. Simple and to the point. Not a lot of "filler". Perfect size to take on the go. I

have been in the photography business for over 30 years and this book taught me a few new things, yet it's also a great book for the not so experienced photographer. If you want to get out there and shoot the night sky ...
