Based on a groundbreaking five-year study, analysing data on 200 management practices gathered over a 10-year period, What Really Works reveals the effectiveness of practices that really matter – the ones that, if followed rigorously, ensure sustained business success. With hundreds of well-known management practices and prescriptions promoted by consultants and available to business, which are really effective and contribute to the growth and continued success of a company? Which do little or nothing? Based on the 'Evergreen Project', a massive, five-year study involving the business school faculties of 10 universities, the authors set out to find the management practices that truly promote long-term growth and success. Their findings will revolutionise the art and practice of business management. The book shows that there are essentially six management practices that all successful companies must master simultaneously. They range from focusing on a strategy of growth to maintaining the depth and quality of human talent in the organisation.

Kris Kuksi's sculptures, rendered in immaculate detail, evoke a grandeur reminiscent of the Baroque era. Kuksi successfully merges this sumptuous echo of the past with a satirical and critical commentary of our modern industrial world. These finely crafted sculptures employ images of Gods and Goddesses from past and present mythologies and examine religious belief and iconography. Despite the frequent portrayal of corruption, violence, chaos and degeneration, the works in this book challenge aspects of our beliefs.
