Thiessen's latest work provides voice to one of the most silent characters in history: Anne Hathaway, the wife of William Shakespeare. The play sheds light on an unexplored aspect of Shakespeare's life by looking through the eyes and heart of the woman who spent a lifetime with-and without-the great poet. This work is the celebration of a life unbowed by tragedy and unapologetic in the face of public scorn.

Barely two decades ago the world's experts in housing policy were giving Canada high marks for its progressive housing policies. Until recently, our own common understanding of homelessness had been limited to occasional wanderers, eccentrics, boozers or addicts. Yet, as a new century dawns, homelessness as we recognize it has changed and grown, offering painful reminders of the soup-kitchen lineups of the depression era. Homelessness is a rapidly growing social problem. Measured in terms of displaced persons, the dimensions of the crisis rival those found during natural disasters such as the Quebec and Manitoba floods, or the great ice storm of '98. Today's homelessness in Canadian communities represents a relatively new phenomenon, difficult to comprehend in this land and time of plenty. How did this happen? How did we get here? What can be done to solve it? Jack Layton, one of this country's leading experts and outspoken activists on housing issues, addresses the crisis from its roots, in order not only to understand the problem, but to find workable solutions. With a stunning combination of rigorous research and compelling personal anecdote, and trenchant and timely analysis from such wide-ranging sources as social scientists, housing economists, mayors, journalists, clergy and the homeless themselves, Homelessness offers insight, perspective and proactive solutions to a seemingly intractable crisis.

This book chronicles artist Sanford Wurmfeld's now legendary color class, which he seeded, developed, and taught at Hunter College in New York City for more than two decades. The "Color Seminar" was geared to both artists and art historians alike, and Wurmfeld taught it each semester for twenty-five years, with his last class taking place in the spring of 2012, the year he retired. All told, more than 500 individuals participated in his elective course, and its extensive and continuing impact on contemporary art discourse, and on abstract painting in particular, cannot be overstated. From studios to classrooms, former students, now established artists in their own right, have been teaching their own interpretations of this course for years now in visual arts and curatorial programs across the country. Wurmfeld's new book begins with a discussion of afterimages and related experiments concerning the nature of color experience. It then works its way through theoretical ideas about color and the phenomenology of perception, finally ending with a discussion of color as content in 20th and 21st century abstraction -- what Wurmfeld terms presentational art -- with its emphasis on artists crafting the viewer experience through an active analysis of color. The book concludes with an exhaustive bibliography of additional resources for readers to continue their own self-directed research into color history and experience.
