This book chronicles artist Sanford Wurmfeld's now legendary color class, which he seeded, developed, and taught at Hunter College in New York City for more than two decades. The "Color Seminar" was geared to both artists and art historians alike, and Wurmfeld taught it each semester for twenty-five years, with his last class taking place in the spring of 2012, the year he retired. All told, more than 500 individuals participated in his elective course, and its extensive and continuing impact on contemporary art discourse, and on abstract painting in particular, cannot be overstated. From studios to classrooms, former students, now established artists in their own right, have been teaching their own interpretations of this course for years now in visual arts and curatorial programs across the country. Wurmfeld's new book begins with a discussion of afterimages and related experiments concerning the nature of color experience. It then works its way through theoretical ideas about color and the phenomenology of perception, finally ending with a discussion of color as content in 20th and 21st century abstraction -- what Wurmfeld terms presentational art -- with its emphasis on artists crafting the viewer experience through an active analysis of color. The book concludes with an exhaustive bibliography of additional resources for readers to continue their own self-directed research into color history and experience.
