This book is intended for geophysicists, astronomers (especially those with an interest in history), historians and orientalist. The culmination of many years of research, it discusses, in depth, ancient and medieval eclipse observations and their importance in studying Earth's past rotation. This was the first major book on this subject to appear in the last twenty years. The author has specialised in the interpretation of early astronomical records and their application to problems in modern astronomy for many years. The book contains an in-depth discussion of numerous eclipse records from Babylon, China, Europe and the Arab lands. Translations of almost every record studied are given. It is shown that although tides play a dominant long-term role in producing

variations in Earth's rate of rotation - causing a gradual increase in the length of the day - there are significant, and variable non-tidal changes in opposition to the main trend.

"Robert Capa: Photographs is the first true retrospective book of one of the century's greatest photographers. Drawing upon hundreds of previously unseen images, this collection reveals Capa as one of the great poets of the camera. In these photographs, we see through the eyes of a driven humanist who was also a documentarian of the highest caliber. While previous volumes on

Capa have focused on his role as a war photographer, "Robert Capa: Photographs shows us the remarkable range of his work, which encompasses the sufferings as well as the tenderness, humor and wonder of his subjects. Robert Capa demonstrated not only a passionate commitment to improving the human condition, but also an unfailing eye for graphic impact. Although his photographs remain the definitive visual records of such momentous events as the siege of Madrid, the bombing of Hankou, and the Allied landings on D-day, many of his images have a timeless and universal quality that transcends the specifics of history. A Spanish soldier recoils at the impact of a bullet, the final instant of his life. In a scene of perfect joy, a group of Chinese children laugh at the sky as snow begins to fall. Four farm workers, hauling all the belongings they can manage, trudge grimly away from an apocalyptic backdrop of smoke and ruins: their

war-devastated homes. Capa's images reveal his profound compassion and perceptiveness about our tenuous human state. As Cornell Capa (Robert's younger brother and the Founding Director Emeritus of the International Center of Photography) writes in his eloquent remembrance: "He managed to travel all over the world, and to communicate his experience and feelings through a universal language: photography." "Robert Capa: Photographs" also includes a foreword by Capa's close friend Henri Cartier-Bresson, as well as an informative historical essay by Capa biographer Richard Whelan. At last, here is the book that reveals Robert Capa in a new light. The extraordinary collection of images in "Robert Capa: Photographs" brings us--through the events of history--to the very heart of humanity.
