Photographic imagery has come a long way from the pinhole

cameras of the nineteenth century. Digital imagery, and its applications, develops in tandem with contemporary society's sophisticated literacy of this subtle medium. This book examines the ways in which digital images have become ever more ubiquitous as legal and medical evidence, just as they have become our primary source of news and have replaced paper-based financial documentation. Crucially, the contributions also analyze the very profound problems which have arisen alongside the digital image, issues of veracity and progeny that demand systematic and detailed response: It looks real, but is it? What camera captured it? Has it been doctored or subtly altered? Attempting to provide answers to these slippery issues, the book covers how digital images are created, processed and stored before moving on to set out the latest techniques for forensically examining images, and finally addressing practical issues such as courtroom admissibility. In an environment where even novice users can alter digital media, this authoritative publication will do much so stabilize public trust in these real, yet vastly flexible, images of the world around us.

If there was ever a man who was born to fly, it is John M. Billings. He took his first plane ride in 1926, began taking piloting lessons in 1938, and joined the US Army Air Force in July 1942. After training he was assigned to fly Consolidated B-24 Liberator long-range bombers. He joined the 825th Bombardment Squadron of the 484th Bombardment Group. After flying fifteen daylight strategic bombing missions, Billings was selected for assignment to the 885th Bombardment Squadron (Heavy) (Special). As its designation suggests, the 885th was no regular bombing unit. The 885th specialized in flying top secret, low-altitude missions at night in support of the clandestine operations of the OSS and the Special Operations Executive. The unit's covert missions included parachuting OSS and SOE agents and supplies deep inside German territory. The most eventful and dangerous of Billings' thirty-nine secret missions with the 885th was his assignment in February 1945 to clandestinely insert a three-man OSS team, code-named Greenup, into Austria. The drop zone selected for the Greenup insertion was located on a glacier in a valley surrounded by mountains in the middle of the snow-covered Alps. Billings and his crew finally found the weather in the Alps clear enough to spot the drop zone,

slip their unwieldy B-24 between the mountain peaks and descend to an altitude just a few hundred feet above the moonlit snow. On Billings' signal, the OSS agents parachuted right on target. The insertion of this OSS team was the inspiration for the feature film *Inglorious Bastards*. However, Brad Pitt's vengeful character was far removed from the leader of the Greenup team, Fred Mayer, who achieved success by infiltrating enemy ranks to gain vital intelligence. After the war, John Billings flew with Trans World Airlines and Eastern Airlines. He also flew more than 300 'Angel Flight' airlift missions which involve the specialized aerial transportation of critically ill medical patients. This is one man's story of a remarkable lifetime of flying, both in peace and in war.

subject under (and above) the sun and published the results of his researches in over thirty lavishly illustrated volumes in Latin. His museum in Rome was famous and visited by everybody in the world of learning. Inevitably, his work has been superseded in most areas of study, but he remains a key figure in the history of ideas and in recent years there has been a revival of interest, in which Joscelyn Godwin has played a leading role. But while every other aspect of his thought has been studied, the fascinating engravings with which he illustrated his ideas have been largely ignored. This book fills that gap. It is divided into 15 chapters grouped by the engravings' subject; these illustrations reveal his singular mind and the way he was drawn to mysticism and magic.
