This beautiful book celebrates the artistry of bird photography and showcases the best of the best. It accompanies an annual competition, Bird Photographer of the Year, which brings together the most outstanding examples of recent bird imagery. The Bird Photographer of the Year competition celebrates the artistry of bird photography, and this large-format book is lavishly illustrated to reflect this. A celebration of avian beauty and diversity, it is a tribute to both the dedication and passion of the photographers as well as a reflection of the quality of today's modern digital imaging systems. The book includes the winning and short-listed images from the sixth year of this annual competition, showcasing some of the finest bird photography and with a foreword by long-term birdwatcher, Bill Bailey. A proportion of the profits from the book goes directly to Birds on the Brink to support their conservation work. The advent of digital technology has revolutionised photography in recent years, and the book brings to life some of the most stunning bird photography currently on offer. It features a vast variety of photographs by hardened pros, keen amateurs and hobbyists alike, reflecting the huge diversity of bird enthusiasts and nature lovers which is so important in ensuring their conservation and survival.

Photographic imagery has come a long way from the pinhole cameras of the nineteenth century. Digital imagery, and its applications, develops in tandem with contemporary society's sophisticated literacy of this subtle medium. This book examines the ways in which digital images have become ever more ubiquitous as legal and medical evidence, just as they have become our primary source of news and have replaced paper-based financial documentation. Crucially, the contributions also analyze the very profound problems which have arisen alongside the digital image, issues of veracity and progeny that demand systematic and detailed response: It looks real, but is it? What camera captured it? Has it been doctored or subtly altered? Attempting to provide answers to these slippery issues, the book covers how digital images are created, processed and stored before moving on to set out the latest techniques for forensically examining images, and finally addressing practical issues such as courtroom admissibility. In an environment where even novice users can alter digital media, this authoritative publication will do much so stabilize public trust in these real, yet vastly flexible, images of the world around us.

Hacking Digital Cameras Taylor & Francis

Award-winning photographer Stuart Franklin's exploration of how we, as humans, are driven to visually document our experiences and the world around us. Stuart Franklin took one of the most powerful photographs of the twentieth century - the 'tank man' in Tiananmen Square, Beijing, 1989. From his insightful position as a photographer, Franklin explores why we are driven to visually document our experiences and the world around us. He focuses on photography but traces this universal need through art, literature and science. Looking at photojournalism, war photography and work recording our culture, Franklin identifies some of its driving impulses: curiosity, outrage, reform and ritual; the search for evidence, for beauty, for therapy; and the immortalization of memory. As our understanding of 'documentary' continues to expand, Franklin considers

photographic staging - where, perhaps, the future of the genre may lie: in search of truth over fact. "This book traces what I shall call the documentary impulse. Here I mean the passion to record, with fidelity, the moments we experience and wish to preserve, the things we witness and might want to reform; or simply the people, places or things we find remarkable...

Photography (and journalism) practised respectfully has the power to educate us all towards a greater understanding and empathy towards others." —Stuart Franklin
