Popular Photography Rocky Nook, Inc. In this new collection of essays, Andrew Feenberg argues that conflicts over the design and organization of the technical systems that structure our society shape deep choices for the future. A pioneer in the philosophy of technology, Feenberg demonstrates the continuing vitality of the critical theory of the Frankfurt School. He calls into question the anti-technological stance commonly associated with its

theoretical legacy and argues that technology contains potentialities that could be developed as the basis for an alternative form of modern society. Feenberg's critical reflections on the ideas of Jürgen Habermas, Herbert Marcuse, Jean-François Lyotard, and Kitaro Nishida shed new light on the philosophical study of technology and modernity. He contests the prevalent conception of technology as an unstoppable force responsive only to its own internal dynamic and politicizes the discussion of its social and cultural construction. This argument is substantiated in a series of compelling and well-grounded case studies. Through his exploration of science fiction and film, AIDS research, the French experience with the "information superhighway," and the Japanese reception of Western values, he demonstrates how technology, when subjected to public pressure and debate, can incorporate ethical and aesthetic values.

Nikon D200 Digital Field Guide

Amherst Media, Inc

In doing so the authors aim to show how the newer microscopies are related to the older types with respect to theoretical resolving power (what you pay for) and resolution (what you get). The book is an introduction to students, technicians, technologists, and scientists in biology, medicine, science, and engineering. It should be useful in academic and industrial research, consulting, and forensics; however, the book is not intended to be encyclopedic. The authors are greatly indebted to the College of Textiles of North

Carolina State University at Raleigh for support from the administration there for typing, word processing, stationery, mailing, drafting diagrams, and general assistance. We personally thank Joann Fish for word processing, Teresa M. Langley and Grace Parnell for typing services, Mark Bowen for drawing graphs and diagrams, Chuck Gardner for photographic services, Deepak Bhattavahalli for his work with the proofs, and all the other people who have given us their assistance. The authors wish to acknowledge the many valuable suggestions given by Eugene G. Rochow and the significant editorial contributions made by Elizabeth Cook Rochow.

The Best of Photojournalism Rocky Nook, Inc.

- The first DSLR with high definition movie capability demands new skills and techniques, and this is the only guide that can help the advanced amateur master them - Written by best-selling author and Nikon technical expert Simon Stafford

Introduction to Microscopy by Means of Light, Electrons, X Rays, or Acoustics Rocky Nook, Inc.

Nature reveals her unseen beauty in an up-close-and-personal fashion in the photographs of Paul Harcourt Davies and

Peter Parks. Zooming in on the "faces" of dragonflies and hornets, unearthing the intricate patterns of fungi and mosses, and even capturing the active beauty of plankton, Nature Photography Close Up presents a "think small" approach to natural subjects. Containing dozens of full-color photographs, each accompanied by a succinct and insightful essay, this gorgeous book doubles as a showcase and an instructional guide. Any photographers with an interest in macro nature photography will enjoy this new way of looking at the unseen wonders around them. **Nikon D60 Digital Field Guide** Rocky Nook, Inc.

A superb hand-on manual containing a wealth of underwater tips, hints and advice - all beautifully illustrated with brand new, full colour images. Martin Edge, a leading authority on underwater photography, will help you capture stunning effects using his popular 'think and consider' system - offering a heightened awareness and understanding of the subject matter, lighting and environment to take the perfect picture. Practical examples take you step-by-step through the basic techniques from photographing shipwrecks, divers, marine life and abstract images to taking photographs at night and 'dual lighting'. In 1999 the late

Jim Church, guru of underwater photography, said: 'As a member of the new generation of underwater photography writers, [Martin has] set a standard that will only be surpassed when [he writes] a third edition.' Here it is, we hope you enjoy it. **Mastering the Nikon Z50** John Wiley & Sons Young explores the features and capabilities of the camera in a way that far surpasses the user's manual. He guides readers through features with step-by-step setting adjustments; color illustrations; and detailed how, when, and why explanations for each option.
