d3000 manual

The D3000 Nikon's newest inexpensive DSLR. It's a good camera all by itself, but it's the worst DSLR Nikon has ever made. What makes it worse by comparison is significantly slower and balkier operation when compared to other Nikon DSLRs. The Nikon D40 is a better camera for less money. The Nikon D3000 is inferior both in operational speed and ease of use, as well as inferior in technical image

quality.

NIKON D3000 USER MANUAL Pdf Download | ManualsLib

The D3000 continues to track focus as long as you hold sown the shutter. MF is manual focus. AF Area Mode. This controls how the D3000 uses its 11 AF areas [o] Single point uses the selected area, period. [x] Dynamic area lets the D3000 start with the area you selected, and move it around if

needed to track a moving subject. This is an old mode; 3D below does the same thing but even better.

Nikon D300s User's Guide - Ken Rockwell

I like the 3D mode, in which the D3000 magically moves the sensor around on its own to track the subject, if either it or you move. You set this at: MENU > CAMERA > AF area mode > 3D-tracking > OK. Once set, you're all set for shooting anything

from sports to still
lives, since the
default AF-A mode
magically optimizes the
D3000 for everything.
All you do is pick a
sensor for starters and
go.
