Scott Kelby, author of the top-selling digital photography book of all time, is back with an entirely new book in his popular series that picks up right where part 4 left off. It's more of that "Ah ha—so that's how they do it," straight-to-the-point, skip-the-techno-jargon stuff you can really use today that made part 1 so successful. In parts 1 through 4 of this series, the most popular chapter in the book has always been the last chapter: "Photo Recipes to Help You Get 'The Shot'." In each of those chapters, Scott shows a final image and then describes how to get that type of shot. Here, in part 5, he gives you what you've been waiting for: an entire book of nothing but those amazing photo recipes. But, he took it up a big notch by adding a behind-the-scenes photo for every single recipe. Now you can see exactly how it was done, so you can get that exact same look every time. In these extra pages, each spread allows you to dig in a little deeper and really unlock the power of these recipes. Scott breaks each spread into four segments: (1) he explains exactly what you're seeing behind the scenes, (2) he lists all of his camera settings, and

lens and lighting info—it’s all there, (3) he gives you his thought process, so you learn exactly why he does it this way, and (4) he shares all the post-processing in Lightroom or Photoshop that goes on after the shoot (this is something other books leave out). Plus, the whole book is packed with tips and insights you won’t find anywhere else. This isn’t a book of theory, full of confusing jargon and detailed concepts. This is a book on which button to push, which settings to use, and exactly how and when to use them. With around 100 of the most popular photographic “tricks of the trade,” the entire book is designed to get you shooting like a pro starting today. You’re gonna love it.

Robert Traill was endowed with a first-class mind and had enjoyed a very complete theological education. Nevertheless, his sermons were not meant to appeal to the learned. He strove throughout to promote practical godliness. Every reader who shares his outlook will find him warm, instructive, and encouraging.

J. C. Ryle, who frequently quotes from Traill in his writings, introduces one of the extracts with the words, 'It has done good and I think will do good to others.'

This edition contains ten additional sermons not included in the 1975 Banner of Truth edition, which are appended to volume 2.

The Flash Photography Field Guide Rocky Nook, Inc.

In 2009, photographer Dustin Diaz began a “365 project,” the goal of which is to shoot and share one picture per day for a year. Not only did Diaz actually complete the project—an achievement in and of itself—he consistently shared both the final image and the behind-the-scenes setup shot for that image, allowing the viewer to see how the shot was arranged. He also included information about exposure, flash power, distance, and light modifiers. The project was a huge hit that attracted thousands of followers. This Is Strobist® Info recreates and expands upon this approach by featuring an image alongside a setup shot that helpfully explains how that image was created. By showing the finished pictures as well as the setup shots for 50 of Diaz’s images, you’ll gain tons of knowledge about the basics—and beyond—of flash photography, including everything from simple one-light shots to images created with five lights and numerous gels, clamps, umbrellas, softboxes, and grids. Additionally, This Is Strobist® Info includes two chapters that guide you through the basics of starting your own lighting kit and explain the important but often-misunderstood inverse square law.
