This Nikon D50 Guide will introduce you to Nikon's extremely popular entry-level camera. A lot of its popularity has to do with how well the camera handles color. If you compare digital SLR photos from different cameras side-by-side, you'll notice that not all cameras capture color in the same way.

Files sizes in the D50 manual are identical to the file sizes I get from my D70. Memory: SD cards, the little ones, not CF as every other Nikon DSLR has used. Instead of jamming in from the back they slide in from the side. Nikon prints a list of recommended cards, which includes Sandisk, Toshiba and Panasonic.

The D50 looks fine at ISO 1,600 if you need it. I'd much rather

have a slightly grainy but sharp image than a less grainy but blurry one. Unlike film, the D50 looks great at high ISOs, so I use them anytime I need them. I would love to use ISO AUTO, but usually don't because it also remains active in Manual exposure mode.
