Nikon's much-anticipated D5100 camera is here. This new model replaces the popular D5000 and creates a nice bridge between the more beginner-level D3100 and the high-end D7000. This book has one goal: to teach D5100 owners how to make great shots using their new Nikon camera. Users learn how to use the

D5100 to create the type of photos that inspired them to buy the camera in the first place. Everything in the book is in service of creating a great image. Starting with the top ten things users need to know about the camera, photographer Rob Sylvan carefully guides readers through the operating features. Owners get practical advice from a pro on which settings to use when, great shooting tips, and even end-of-

chapter assignments.

In late 2020, Nikon unveiled the Z6 II, a mirrorless full-frame camera. It replaces the beloved Nikon Z6 and boosts upon its predecessor in every way imaginable: speed, functionality, and user friendliness. The Z6 II boasts a better focusing system with 273 focus points and a 24.5-megapixel BSI CMOS sensor that can shoot 4K video at up to 30 frames per second. It also includes two EXPEED 6 image

processors. It supports both SD and XQD cards in its twin card slots, and it also includes Wi-Fi and Bluetooth, among other things. If you're a photographer searching for a versatile camera that can shoot both stills and videos, the Nikon Z6 II is an excellent option. Design Upgrades
The Nikon Z6 II is noticeably more compact than its before, and it sports a new style that is both sleeker and more up-to-date. With a magnesium frame and carbon fiber reinforcements, it's surprisingly lightweight for how sturdy it is. The

camera's layout keeps controls within easy reach, making it a breeze to operate. For instance, the camera's menus may be accessed not by buttons on the rear but rather via an LCD on the top of the device and a corresponding eyelet next to each lens attachment. What you will be getting Nikon's newest addition to their mirrorless camera series, the Z6 II, seeks to build upon the success of the original Nikon Z6. The Z6 II is going to be well-liked among photographers with its upgraded autofocus system, dual EXPEED 6 CPU, and capacity

to capture 4K video. In addition to the increased low-light capabilities and longer battery life, the Z6 II's other notable features include two memory card slots for more storage options. It has some of the most advanced capabilities of any camera in its price range. I am curious as to what features this new powerhouse from Nikon will provide. With a 45.7-megapixel full-frame sensor, robust built-in Wi-Fi, and a more simplified menu system, the Z6 II makes Nikon's cutting-edge photographic technology accessible to a wider

audience. The camera has a 1/32000 second shutter speed and a refined 51-point Autofocus system, making it great for capturing fast-moving scenes. Whether you're looking for more control while filming fast-paced action or capturing slower action at a distance, the Z6 II is the first Nikon camera to provide 4K UHD video recording at 30 fps in addition to full HD 1080p video at 60 fps. Nikon's new Z6 II will be available in the company's distinctive black color scheme and is compatible with all of Nikon's existing lenses including
