This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi. "A thrilling story of seduction, betrayal, and loss, Freud's Mistress will titillate fans of *Memoirs of a Geisha* and *The Other Boleyn Girl*." —Booklist In fin-de-siècle Vienna, it was not easy for a woman to find fulfillment both intellectually and sexually. But many believe that Minna Bernays was able to find both with one man—her brother-in-law, Sigmund Freud. At once a portrait of two sisters—the rebellious, independent Minna and her inhibited sister, Martha—and of the compelling and controversial doctor who would be revered as one of the twentieth century's greatest thinkers, *Freud's Mistress* is a novel rich with passion and historical detail

and "a portrait of forbidden desire [with] a thought-provoking central question: How far are you willing to go to be happy?" \* \* Publishers Weekly

A history of the nightclub from Studio 54 to the Double Club Nightclubs and discothèques are hotbeds of contemporary culture. Throughout the 20th century, they have been centres of the avant-garde that question the established codes of social life and experiment with different realities, merging interior and furniture design, graphics and art with sound, light, fashion and special effects to create a modern Gesamtkunstwerk. *Night Fever: A Design History of Club Culture* examines the history of the nightclub, with examples ranging from Italian nightclubs of the 1960s that were created by members of the Radical Design group to the legendary Studio 54 in New York, Philippe Starck's *Les Bains Douches* in Paris and the more recent *Double Club* in London, conceived by German artist Carsten Höller for the Prada Foundation. Featuring films and vintage photographs, posters and fashion,

Night Fever takes the reader on a fascinating journey through a world of glamour, subculture and the search for the night that never ends.

"This lavish volume tells the history of  
the Orsay Museum, its collections,  
and its illustrious donors. Central to  
the book, however, are the  
masterpieces on exhibit at the  
museum: the painting, sculpture,  
photography, and decorative arts that  
tell the story of the artistic and  
cultural developments that arose in  
France between the Second Empire  
and the Third Republic. From the  
Romanticism of Delacroix to Courbet's  
Realism, and from the landscapes of  
the Barbizon painters to the  
Symbolism of Burne-Jones, Redon,  
and Rodin, to the extraordinary  
Impressionist movement when artists  
such as Manet, Monet, and Renoir  
paved the way for the pioneers of  
modern art, this era formed the  
artistic sensibility of the entire  
twentieth century."--B&N.

Do you wonder how movies –  
sequences of static frames – appear to  
move, or why 3-D films look different  
from traditional movies? Why does  
ventriloquism work, and why can  
airliner flights make you feel  
disoriented? The answers to these  
and other questions about the human  
senses can be found within the pages  
of Foundations of Sensation and  
Perception. This third edition  
maintains the standard for clarity and  
accessibility combined with rigor  
which was set in previous editions,  
making it suitable for a wide range of  
students. As in the previous editions,  
the early chapters allow students to  
grasp fundamental principles in  
relation to the relatively simple  
sensory systems (smell, taste, touch  
and balance) before moving on to  
more complex material in hearing and  
vision. The text has been extensively  
updated, and this new edition includes:  
a new chapter devoted to attention  
and perception over 200 new  
references over 30 new figures and  
improved, more colorful, visual  
presentation a new companion website

with a range of resources for students and lecturers. The book contains a range of pedagogical features, including tutorial sections at the end of each chapter. This distinctive feature introduces areas of the subject which are rarely included in student texts, but are crucial for establishing a firm foundation of knowledge. Some tutorials are devoted to more advanced and technical topics (optics, light measurement, Bayesian inference), but treated in an accessible manner, while others cover topics a little outside of the mainstream (music perception, consciousness, visual art). Foundations of Sensation and Perception will enable the reader to achieve a firm grasp of current knowledge concerning the processes that underlie our perception of the world and will be an invaluable resource for those studying psychology, neuroscience, and related disciplines.

**Sustainable Agroecosystem Management** Little, Brown Books for Young Readers

The olive (*Olea europaea*) is increasingly recognized as a crop of great economic and health importance world-wide. Olive growing in Italy is very important, but there is still a high degree of confusion regarding the genetic identity of cultivars. This book is a source of recently accumulated information on olive trees and on olive oil industry. The objective of this book is to provide knowledge which is appropriate for students, scientists, both experienced and inexperienced horticulturists and, in general, for anyone wishing to acquire knowledge and experience of olive cultivation to increase productivity and improve product quality. The book is divided into two parts: I) the olive cultivation, table olive and olive oil industry in Italy and II) Italian catalogue of olive varieties. All chapters have been written by renowned professionals working on olive cultivation, table olives and olive oil production and related disciplines. Part I covers all aspects of olive fruit production, from site selection, recommended varieties, pest and disease control, to primary and secondary processing. Part II contains the chapter on the description of Italian olive varieties. It is well illustrated and includes

200 epiographic cards with colour photos, graphs and tables.
