What ' s a Cellphilm? explores cellphone video production for its contributions to participatory

visual research. There is a rich history of integrating participants ' videos into community-based research and activism. However, a reliance on camcorders and digital cameras has come under criticism for exacerbating unequal power relations between researchers and their collaborators. Using cellphones in participatory visual research suggests a new way forward by working with accessible, everyday technology and integrating existing media practices. Cellphones are everywhere these days. People use mobile technology to visually document and share their lives. This new era of democratized media practices inspired Jonathan Dockey and Keyan Tomaselli to coin the term cellphilm (cellphone + film). The term signals the coming together of different technologies on one handheld device and the emerging media culture based on people ' s use of cellphones to create, share, and watch media. Chapters present practical examples of cellphilm research conducted in Canada, Hong Kong, Mexico, the Netherlands and South Africa. Together these contributions consider several important methodological questions, such as: Is cellphilm a new research method or is it repackaged participatory video? What theories inform the analysis of cellphilms? What might the significance of frequent advancements in cellphone technology be on cellphilms? How

does our existing use of cellphones inform the research process and cellphilm aesthetics? What are the ethical dimensions of cellphilm use, dissemination, and archiving? These questions are taken up from interdisciplinary perspectives by established and new academic contributors from education, Indigenous studies, communication, film and media studies.

Now that you've bought that amazing new DSLR, you need a book that goes beyond the camera manual to teach you exactly how to take those great shots. Mastering the concept of exposure is the best place to begin. With *Exposure: From Snapshots to Great Shots*, you'll learn about the essential relationship between exposure and light, and you'll learn how aperture, shutter speed, and ISO (the "exposure triangle") are fundamentally linked in the effort to achieve a great image: you use them to control both the light and the creative decisions you make about your shot. With *Exposure: From Snapshots to Great Shots*, you'll learn not only what makes a great shot work---you'll learn how to get that shot. And once you've got the shot, show it off! Join the book's Flickr group, share your photos, and discuss how you use your camera to get great shots at flickr.com/groups

Nearly every DSLR camera available today also shoots beautiful high-definition video. YouTube and Facebook are bursting with user-generated content as people share their memories and travels. Whether it's highlights from a great vacation, the kids' soccer game, or family gatherings, everyone wants to create compelling video to document it. While DSLR cameras are quite capable of shooting video, for many, their foray into video shooting can be frustrating. Footage tends to be dark and out of focus and suffers from camera shake and bad audio. In *Creating DSLR Video: From Snapshots to Great Shots*, photographer and video expert Rich Harrington demystifies the process and teaches a solid foundation for capturing great video. Whether readers have been dabbling in video already or have never even used that mode on their camera, they will learn how to go from capturing mediocre video to creating compelling footage--and all the steps in between! Readers will also learn the essentials of video editing and publishing to the web; how to make the most of their existing equipment; affordable options to improve video capture; and much more! To supplement the book, readers will gain sample videos that further demonstrate the techniques presented in the book.
