Merely said, the Nikon D70s Manual Espanol is universally compatible with any devices to read

Digital Photography Masterclass Premier Press

From the author of the New York Times bestseller *Letters of Note* comes a collection of 75 of history's most interesting, profound, and sometimes unknown speeches from a range of scintillating personalities such as Frederick Douglass, Justin Trudeau, Albert Einstein, Meghan Markle, Barbara Jordan, and Ursula K. Le Guin. This thoughtfully curated and richly illustrated collection celebrates oratory old and new, highlighting speeches we know and admire, while also shining a light on profound drafts that were never delivered or have until now been forgotten. From George Bernard Shaw's warm and rousing toast to Albert Einstein in 1930 and the commencement address affectionately given to graduates at Long Island University by Kermit the Frog, to the chilling public announcement (that was thankfully never made) by President Richard Nixon should Neil Armstrong and Buzz Aldrin become stranded on the moon, *Speeches of Note* honors the words and ideas of some of history's most provocative and inspiring personages.

The price we pay for the new strategies in database marketing that closely track desirable customers, offering them benefits in return for personal information. We have all been to Web sites that welcome us by name, offering us discounts, deals, or special access to content. For the most part, it feels good to be wanted—to be valued as a customer. But if we thought about it, we might realize that we've paid for this special status by turning over personal information to a company's database. And we might wonder whether other customers get the same deals we get, or something even better. We might even feel stirrings of resentment toward customers more valued than we are. In *Niche Envy*, Joseph Turow examines the emergence of databases as marketing tools and the implications this may have for media, advertising, and society. If the new goal of marketing is to customize commercial announcements according to a buyer's preferences and spending history—or even by race, gender, and political opinions—what does this mean for the twentieth-century tradition of equal access to product information, and how does it affect civic life? Turow shows that these marketing techniques are not wholly new; they have roots in direct marketing and product placement, widely used decades ago and recently revived and reimagined by advertisers as part of "customer relationship management" (known popularly as CRM). He traces the transformation of marketing techniques online, on television, and in retail stores. And he describes public reaction against database marketing—pop-up blockers, spam filters, commercial-skipping video recorders, and other ad-evasion methods. Polls show that the public is nervous about giving up personal data. Meanwhile, companies try to persuade the most desirable customers to trust them with their information in return for benefits. *Niche Envy* tracks the marketing logic that got us to this uneasy impasse.

"David Busch's Nikon D5000 Guide to Digital SLR Photography shows you how to maximize your camera's robust feature set, including 12 megapixel resolution, 13 versatile new Scene modes, blazing-fast automatic focus, the real-time preview system Live View, and even HDTV movie-making capabilities. You'll learn how, when, and, most importantly, why to use each of the cool features and functions of your camera to take eye-popping photographs. Introductory chapters will help you get comfortable with the basics of your camera before you dive right into exploring creative ways to

apply the Nikon D5000's exposure modes, focus controls, and electronic flash options. You'll also find loads of helpful information and tips on choosing lenses, flash units, and software products to use with your new camera"--Resource description p.

The Digital Subject Springer Science & Business Media

This volume provides a unique survey of locally produced funerary representations from across regions of ancient Syria, exploring material ranging from reliefs and statues in the round, to busts, mosaics, and paintings in order to offer a new and holistic approach to our understanding of ancient funerary portraiture. Up to now, relatively little attention has been paid to the way in which local and regional production of material in this area formed part of a broader pattern of sculptural and iconographical development across the Roman Near East. By drawing on material from an area encompassing modern Lebanon, Jordan, Syria, and Turkey, as well as Egypt and Achaia, the contributions in this book make it possible for the first time to take a wider perspective on the importance of funerary portraiture within Greater Roman Syria, and in doing so, to identify influences, connections, and iconographical analogies present throughout the region, as well as local differences, larger-scale boundaries, and ruptures in traditions that occurred across time and place.

Start building your knowledge and confidence, while bringing your vision to light with the Nikon D3400 today.

Nikon D70 Digital Field Guide Stewart, Tabori and Chang

Today's photographic equipment allows amateurs to take pictures of the stars that far surpass images taken just a few decades ago by even the largest observatories—and this book will teach you how. Author and world-renowned astrophotographer Thierry Legault teaches the art and techniques of astrophotography: from simple camera-on-tripod night-scene imaging of constellations, star trails, eclipses, artificial satellites, and polar auroras to more intensive astrophotography using specialized equipment for lunar, planetary, solar, and deep-sky imaging. Legault shares advice on equipment and guides you through techniques to capture and process your images to achieve spectacular results. Astrophotography provides the most thorough treatment of the topic available. This large-format, richly illustrated book is intended for all sky enthusiasts—newcomers and veterans alike. Learn how to: Select the most useful equipment: cameras, adapters, filters, focal reducers/extenders, field correctors, and guide telescopes Set up your camera (digital, video, or CCD) and your lens or telescope for optimal results Plan your observing sessions Mount the camera on your telescope and focus it for razor-sharp images Polar-align your equatorial mount and improve tracking for pin-point star images Make celestial time-lapse videos Calculate the shooting parameters: focal length and ratio, field of view, exposure time, etc. Combine multiples exposures to reveal faint galaxies, nebulae details, elusive planetary structures, and tiny lunar craters Adjust contrast, brightness, light curves, and colors Postprocess your images to fix defects such as vignetting, dust shadows, hot pixels, uneven background, and noise Identify problems with your images and improve your results

Astrophotography Rocky Nook, Inc.

Fiona is the creator of fashion doll sensation Kimberley, and is quite satisfied with her career-focused life. Yet when her boss informs her that she must win over a new account by going camping with the creator of a hit children's TV show, she is extremely reluctant. Nevertheless, she goes to Florida to meet Roy and his Guide Ace Montgomery. When Roy is found dead with Fiona holding the bloody knife, she becomes the prime suspect - though she has no recollection of what happened. Things get worse when she learns that Roy, until now a stranger to her, left her all the proceeds from his new TV show, giving her a strong motive for murder. Suddenly, she and Ace find themselves on the run, and being condemned by the press for murder. They must prove their innocence by discovering the true motive and murderer of Roy. Fiona and Ace figure out they are linked through her father, and it is then that Fiona learns the secrets of her family's past, turning her world upside down.

Chocolate Desserts by Pierre Herme Princeton University Press

Fast evolving into the French Martha Stewart, Sophie Dudemaine is the star of a popular lifestyle show on the French Food Channel. In her first cookbook published in the United States, Sophie shares the original recipes that catapulted her into the limelight: her mouthwatering, sweet and savory cakes and loaves. Sophie's loaves first debuted in her neighborhood French markets, where word quickly spread that these creations were not just wonderful hors d'oeuvres or tea-time treats but perfectly satisfying meals in and of themselves. Her business quickly expanded into nearby bakeries, and she began selling her loaves at Fauchon, the celebrated Paris food emporium. The recipes in this book are organized seasonally, since Sophie stresses the importance of fresh ingredients to enhance the flavor of each loaf. Her hearty Mushroom and Gruyere Loaf is perfect for crisp autumn nights, and her bright and tangy Lemon Cake and fresh Tomato-Mozzarella-Basil Loaf are delightful on a warm summer day. Sophie prides herself on the simple preparation required for each one of the cakes; in fact all her ingredients are mixed in one bowl and baked in one pan. Sophie's imaginative cakes are a treat for both family meals and special occasions.-- The ultimate preparation for the savvy chef: everything gets mixed in one bowl and baked in one pan-- Recipes are simple and easy to follow -- great for beginner cooks and children-- Many of the loaves can be prepared from items found in the home refrigerator, and almost all ingredients are readily available in local markets-- Time is a luxury, says Sophie; all of these loaves are quick to prepare and many can be prepared ahead of time and stored for days in the refrigerator

A treasure-trove of illuminating and entertaining quotations from beloved physicist Richard P. Feynman "Some people say, 'How can you live without knowing?' I do not know what they mean. I always live without knowing. That is easy. How you get to know is what I want to know."—Richard P. Feynman Nobel

Prize-winning physicist Richard P. Feynman (1918–88) was that rarest of creatures—a towering scientific genius who could make himself understood by anyone and who became as famous for the wit and wisdom of his popular lectures and writings as for his fundamental contributions to science. The Quotable Feynman is a treasure-trove of this revered and beloved scientist's most profound, provocative, humorous, and memorable quotations on a wide range of subjects. Carefully selected by Richard Feynman's daughter, Michelle Feynman, from his spoken and written legacy, including interviews, lectures, letters, articles, and books, the quotations are arranged under two dozen topics—from art, childhood, discovery, family, imagination, and humor to mathematics, politics, science, religion, and uncertainty. These brief passages—about 500 in all—vividly demonstrate Feynman's astonishing yet playful intelligence, and his almost constitutional inability to be anything other than unconventional, engaging, and inspiring. The result is a unique, illuminating, and enjoyable portrait of Feynman's life and thought that will be cherished by his fans at the same time that it provides an ideal introduction to Feynman for readers new to this intriguing and important thinker. The book features a foreword in which physicist Brian Cox pays tribute to Feynman and describes how his words reveal his particular genius, a piece in which cellist Yo-Yo Ma shares his memories of Feynman and reflects on his enduring appeal, and a personal preface by Michelle Feynman. It also includes some previously unpublished quotations, a chronology of Richard Feynman's life, some twenty photos of Feynman, and a section of memorable quotations about Feynman from other notable figures. Features: Approximately 500 quotations, some of them previously unpublished, arranged by topic A foreword by Brian Cox, reflections by Yo-Yo Ma, and a preface by Michelle Feynman A chronology of Feynman's life Some twenty photos of Feynman A section of quotations about Feynman from other notable figures Some notable quotations of Richard P. Feynman: "The thing that doesn't fit is the most interesting." "Thinking is nothing but talking to yourself inside." "It is wonderful if you can find something you love to do in your youth which is big enough to sustain your interest through all your adult life. Because, whatever it is, if you do it well enough (and you will, if you truly love it), people will pay you to do what you want to do anyway." "I'd hate to die twice. It's so boring."
